

Fairchem Organics Ltd.

COMPANY BACKGROUND.....

- Fairchem Organics Ltd. (Fairchem) is engaged in the business of manufacturing of Oleo Chemicals and Nutraceuticals, since the last 27 years.
- It has a state-of-the-art manufacturing unit which was set up in 1995 and has
 over the years gone through various stages of expansion, backward
 integration, debottlenecking and technological advancements to create a one
 of its kind world class facility.
- The company's key oleo chemical products include Dimer Acid, Linoleic Acid, Palmitic Acid, Monomer Acid, and nutraceutical products include Mixed Tocopherols and Sterol concentrate.
- Fairchem supplies to various marquee customers like Asian Paints, Huber (erstwhile Micro Inks), Arkema, BASF, Cargill etc.

BUSINESS MIX

- Oleo Chemicals: Oleo Chemicals are chemicals derived from Plant and Animal Fats. They are analogous to petrochemicals derived from petroleum. Fairchem is a leading producer of Fatty Acids from natural oils and fats derived from vegetable oils. The company has over the years developed and mastered the process of manufacturing its entire product range from waste/by product streams of natural vegetable oils by utilizing state of the art equipment's of acceptable local and international quality.
- **Nutraceuticals:** Nutraceutical, a portmanteau of the words "nutrition" and "pharmaceutical" applied to products that range from isolated nutrients, dietary supplements and herbal products, specific diets, genetically modified food, and processed foods such as cereals, soups, and beverages. Fairchem currently produces (Natural) Mixed Tocopherol Concentrate /Natural vitamin E which it primarily exports to global MNCs.

KEY STRENGTHS.....

- Major Player in the Indian Oleo Chemical Market using Renewable Resources.
- Strong Customer and Supplier Relationships.
- One-of-a-kind manufacturing process using by-products of vegetable oils to create value added products hence creating wealth.
- Promoted by Fairfax Capital and backed by experienced Management team.
- Judicious strategy on capacity expansion by evaluating market demandsupply scenario and working very closely with its customer base.

Oleo Chemicals:

- Linoleic Acid: It is designed especially to produce fast drying protective coating having lighter colour. It is an unsaturated fatty acid and is a liquid at room temperature. The only company to manufacture Linoleic Acid of such quality in India. Cost advantage due to usage of by product of vegetable oil refinery as raw material.
- Dimer Acid: It also known as dimerized fatty acids; prepared from unsaturated fatty acids obtained from vegetable oil. It is a light yellow or yellow viscous transparent liquid. It is non-toxic. Fairchem is the only company to manufacture this product in India. Offers improved bonding. Used as curing agents for epoxybased anti-corrosion coatings and for priming and protecting metal. Dimer acids act as a stabilizer in lubricants used for Cold Rolling Mills. Increase the life span of nylon products Applications. The company supplies this product as an import substitute for sale to consumers in Surface Coating and Printing Ink industry on import parity with added advantage of just-in-time delivery and better quality. As a result Fairchem has been preferred supplier for most of its clients and believes it would gradually substitute large part of its client requirement, which are met through import at present.
- Monomer Acid & Distilled Fatty Acids: Fairchem is one of the leading producers
 of Monomer and Other distilled fatty acids with significantly lower raw material
 costs. Monomer Acids are non-petroleum, non-animal based products that can
 be used as substitutes for various vegetable and tallow-based fatty acid
 derivative products. Fatty acids are obtained from hydrolysing fats and oils of
 animal and plant origin at a high pressure and temperature. They are then
 distilled, obtaining a product with a white appearance and a soapy feel.
- Isostearic Acid: It is commonly used in cosmetics and personal care products due
 to its excellent lubricating and moisturizing properties, as well as its resistance to
 oxidation. This versatile ingredient enhances the texture and stability of
 formulations, making it a popular choice in skin care, hair care, and industrial
 applications such as lubricants and metalworking fluids. Isostearic acid is known
 for being non-comedogenic, making it suitable for sensitive and acne-prone skin.
 Its stability and functionality contribute to its widespread use in various
 formulations.

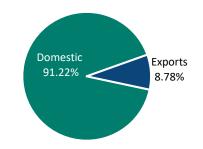

Nutraceuticals:

- Mixed Tocopherol Concentrate: Tocopherol is used as raw material to manufacture natural Vitamin E. Natural Vitamin E is almost 3-4 times more expensive than synthetic Vitamin E. Developed markets like US and Europe are the key consumers due to the high value of the product. Only method of manufacturing Natural Vitamin E is through vacuum distillation of the raw material which is a by-product of vegetable oil refining Deodorizer Distillate. Fairchem is the dominant manufacturer of Mixed Tocopherol Concentrate in India which is sold on 'Freight Saving', 'Production Cost Saving' and 'By-product Value concept'.
- Key clients for Nutraceuticals are BASF, Cargill Inc. (U.S.A).

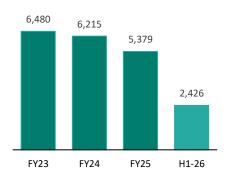

Capacity Expansion:

- FY21: Increased from 45,000 MTPA to 72,000 MTPA
- FY22: Increase Capacity from 72,000 MTPA to 90,000 MTPA
- FY23: Increased Capacity to 120,000 MTPA
