## ANTIQUE'S MORNING PRESENTATION

## FROM THE RESEARCH DESK

QUARTERIY RESULTS REVIEW
ICICl Bank
In-line; consistently strong performance

## Kotak Mahindra Bank

Core performance strong; RBI approves new MD \& CEO
JSW Steel
EBITDA aided by higher volumes and lower costs
Hindustan Zinc
In-line performance; lower costs offset weaker metal prices
Havells India
Lloyd hampers earnings yet again
JSW Energy
Remains on the guided path!
Voltas
EMP provision mars profits yet again, pain to persist for now Laurus Labs
Inferior business mix drags margins
Kajaria Ceramics
In-line quarter, demand revival anticipated
Century Textiles \& Industries
Real estate on a strong growth path; a blip in paper
Equitas Small Finance Bank
Steady earnings growth; asset quality to be monitored
South Indian Bank
Core profitability was impacted by higher costs
Kirloskar Pneumatic Company
Another soft quarter
ANTIQUE'S INDIA ECONOMIC MONITOR
Monetary policy
Rates may remain unchanged in FY24

## Global News

- The major averages saw further downside going into the close, ending the session near their worst levels of the day. The Nasdaq plunged 202.37 points or 1.5 percent to $12,983.81$, the S\&P 500 tumbled 53.84 points or 1.3 percent to $4,224.16$ and the Dow slid 286.89 points or 0.9 percent to $33,127.28$.
- The Nikkei 225 Index fell $0.54 \%$ to close at 31,259 while the broader Topix Index lost $0.38 \%$ to 2,256 on Friday, hitting their lowest levels in two weeks and tracking losses on Wall Street overnight, as US Federal Reserve Chair Jerome Powell said that inflation remains too high and monetary policy was not yet too tight.

## Sector \& Corporate News

- Zydus Lifesciences has received approval from the United States Food and Drug Administration (USFDA) for its New Drug Application (NDA) for ZITUVIO (Sitagliptin) tablets, $25 \mathrm{mg}, 50 \mathrm{mg}$, and 100 mg . ZITUVIO contains active ingredient Sitagliptin, a dipeptidyl peptidase-4 (DPP-4) inhibitor indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

## 2QFY24 RESULT REVIEW

## ICICI Bank

## In-line; consistently strong performance

ICICI Bank (ICICIBC) reported a 2QFY24 PAT of INR 102 bn (RoA of 2.4\%; stable QoQ), up 35\% YoY, beating our and consensus estimate of INR 96.7 bn/ INR 94.9 bn respectively due to lower than expected provision. NII growth was at 24\% YoY (in-line). NIM declined 25 bps QoQ (was still up 22 bps YoY) at $4.5 \%$. Fee income growth was healthy at $16 \% \mathrm{YoY} / 8 \%$ QoQ led by an improvement in corporate fee growth of 22\% YoY. Core PPP grew 23\% YoY (marginally ahead of estimate, $3.2 \%$ of average assets) and credit cost was low at 22 bps. Gross slippage ratio declined sequentially from $\mathbf{2 . 4 \%}$ to $2 \%$. NNPLs were stable QoQ at $0.4 \%$, restructured loans remain low at $0.3 \%$, and BB and below pool at $0.4 \%$ continues to moderate with countercyclical buffers standing at 1.5\% of overall loans. Loan growth remains healthy (5\% QoQ and $18 \%$ YoY), with a fairly good all-round growth. Deposit mobilization was strong at 4.5\% QoQ (19\% YoY) led by a sharp 9\% QoQ increase in TD while CASA growth declined by 2\% QoQ. We largely maintain our estimates and introduce FY26 estimates with a revised TP of INR 1,225 (1 HFY26 SoTP) vs. INR 1,175 earlier. Maintain BUY.
Core performance was in-line; low credit cost drives PAT beat: NIM contracted 25 bps QoQ (KMB: -35 bps QoQ) at 4.5\% (domestic NIM at 4.6\%; -27 bps QoQ) as cost of funds increased by 18 bps QoQ, while yield on loans declined marginally 5 bps QoQ. Management stated that NIM in FY24 will remain in the range of FY23 (which was at 4.5\%). NII grew 24\% YoY/ flat QoQ; fees grew strongly $16 \%$ YoY/ 8\% QoQ. Opex growth was at 4\% QoQ $(21 \%$ YoY) due to a $9 \%$ QoQ increase in other opex. Core PPP grew $23 \%$ YoY/ 1\% QoQ and stood at $3.2 \%$ of average assets. Core credit cost was low at 22 bps (vs. 50 bps in 1QFY24) which led to PAT growth of $35 \%$ YoY/ $6 \%$ QoQ and RoA remained stable QoQ at $2.4 \%$.
Loan growth remained broad-based; deposit growth was led by TD: Domestic loans grew $19 \%$ YoY/5\% QoQ and overseas loans increased by $13 \%$ QoQ. Within domestic loans, SME growth was strong at $29 \%$ YoY (7\% QoQ), retail book grew $22 \%$ YoY ( $6 \%$ QoQ), and corporate book growth was at $15 \% \mathrm{YoY} / 3 \%$ QoQ. Within retail, growth was strong in the unsecured porffolio, PL ( $40 \%$ YoY/ 10\% QoQ), credit cards were up $29 \%$ YoY/ 6\% QoQ, which together contributed $13 \%$ of the overall loans. Management stated that the bank is comfortable with its unsecured porffolio and does not see any concerning trends. Mortgages grew $16 \%$ YoY/ $4 \%$ QoQ, business banking was up by $11 \%$ QoQ, and rural loans were up $4 \%$ QoQ. Deposits grew $19 \%$ YoY/ $5 \%$ QoQ, led by a $9 \%$ QoQ increase in TD, while CASA declined $2 \%$ QoQ and the average CASA ratio stood at $40.8 \%$ (vs. $42.6 \%$ in 1QFY24).
Headline NPL ratio declined sequentially; net slippages were NIL: Gross slippage ratio declined from $2.4 \%$ to $2 \%$ QoQ as retail slippages declined from $3.3 \%$ to $2.7 \%$ while corporate \& SME slippages remained stable QoQ at $0.4 \%$. Recoveries and upgrades remain healthy which led to NIL net slippage ratio (vs. 0.8\% in 1QFY24). GNPL/ NNPL/ PCR ratios were at $2.5 \% / 0.4 \% / 83 \%$ as against $2.8 \% / 0.5 \% / 83 \%$ respectively in 1QFY24. Net stress on B/S (including NNPL, restructuring book, and BB \& below) was at $1.6 \%$. The bank continues to hold a contingency provision buffer, which stood at 147 bps of loans.

## Investment Summary

The bank continues to consistently deliver strong performance with superior RoA, strong asset quality, and balance sheet. While core revenue is expected to moderate and low credit cost is expected to normalize, strong buffers created would help protect/ smoothen earnings, even if the macroeconomic environment turns adverse. We expect RoA of $2.3 \% / 2 \%$ and RoE of $18 \% / 16 \%$ over FY24/ 26E and maintain BUY with a revised SoTP-based TP of INR 1,225 (2.8x for banking business and INR 156 for subsidiaries). ## Conference Call Highlights

- The bank's strategic focus continues to be on growing core operating profit through 360degree customer-centric approach.
- The bank's overseas loan portfolio comprises $3 \%$ of the total loan book. Of the overseas porffolio, $90 \%$ comprise Indian corporates, $6 \%$ overseas corporate with India linkage, $2 \%$ comprise companies owned by NRIs, and the balance $2 \%$ is non-India linked.
- Loan book by benchmark type: $48 \%$ repo linked, $18 \%$ MCLR, $31 \%$ fixed rate loans, and $3 \%$ other external benchmark-linked.
- Average LCR for the quarter was $122 \%$.
- Sequential decline in NIM was due to the lagged impact of an increase in term deposit rate on the cost of deposits. However, incremental retail term deposit rates have largely stabilized.
- Management expects a further increase in the cost of deposits which may impact NIM, but NIM in FY24 is likely to be in the range of FY23.
- Impact of interest on income tax refund on NIM was NIL during the quarter as compared to 3 bps impact in the previous quarter.
- ICRR impact on NIM was marginal at 2-3 bps.
- Retail accounts for $78 \%$ of the total fees.
- Increase in other opex was due to retail business-related and technology expenses. Technology expenses were about $9.2 \%$ of opex in 1HFY24.
- Decline in provision on a sequential basis reflects higher NPA addition from the KCC porffolio in the previous quarter and corporate recoveries and upgrades.
- On unsecured portfolio, management stated that trends in personal loans and credit cards are quite stable and delinquencies are well within the range. However, on industrywise trends, there is some level of distinction between large-ticket size and small-ticket size personal loans. The bank has a very minimal presence in smaller ticket-size loans.
- The bank continue to monitor the unsecured loans portfolio and current trends are not concerning.

## 2QFY24 RESULT REVIEW

## Kotak Mahindra Bank

## Core performance strong; RBI approves new MD \& CEO

Kotak Mahindra Bank (KMB) reported a 2QFY24 standalone PAT of INR 31.9 bn (24\% YoY, 4\% above estimate) with RoA of 2.4\% and consolidated PAT of INR 44.6 bn. Key highlights: NIM at $5.22 \%$, down 35 bps QoQ (of which, management mentioned, 15 bps was one-off due to higher liquidity buffers built-in) as cost of funds increased 42 bps QoQ (36 bps QoQ in 1QFY24) and yield on loans were flat. NII growth of 23\% YoY was in line with estimates; core PPP grew 28\% YoY, $6 \%$ QoQ ( $5 \%$ above est.) driven by strong core fee income of INR 20.3 bn ( $\mathbf{2 4 \%}$ YoY, 11\% QoQ, 6\% above estimate). Opex and provisions were flat QoQ. SA deposits were flat QoQ ( $2 \%$ YoY), but TD sweep saw an acceleration ( $28 \%$ QoQ). Loan growth momentum was strong at $6 \%$ QoQ and $18 \%$ YoY with the share of unsecured retail loans now at $11 \%$ vs. 8.7\% YoY. Asset quality continues to remain strong with the net slippage ratio at $0.5 \%$. Subsidiaries' performance was better than estimated, especially from the broking business. The bank has got approval from RBI to appoint Mr. Ashok Vaswani as the new CMD \& CEO for a period of three years. He has a strong track record of over three decades with global banks such as Barclays Bank, UK (ex-CEO) and Citi (CEO-APAC). We largely maintain estimates as we roll forward to 1 HFY26 and retain BUY with an unchanged TP at INR 2,250 (2.9x for banking business and INR 597 for subsidiaries).
Higher fees and stable opex led to core PPoP beat: NII grew 24\% YoY, 1\% QoQ as NIM compressed 35 bps QoQ to $5.2 \%$ ( 53 bps decline in 1HFY24). NIM compression was largely driven by the cost of funds rising 42 bps QoQ ( 78 bps - 1HFY24) with the yield on loans remaining flat QoQ. Management has maintained its $+5 \%$ NIM guidance as the yield on loans is expected to be stable and the pace of increase in the cost of funds likely to moderate. Fees grew $24 \%$ YoY, $11 \%$ QoQ. Non-core income declined QoQ due to lower trading and MTM gains of INR 1.5 bn vs. INR 2.4 bn QoQ as well as dividends from subsidiaries of INR 3.1 bn in 1QFY24. This led to PPoP declining by $7 \%$ QoQ despite a strong $29 \%$ YoY growth. Opex and provisions were stable QoQ with credit cost declining to 47 bps vs. 54 bps in 1QFY24. Overall, PAT saw 23\% YoY growth but an 8\% QoQ decline leading to RoA coming in at $2.4 \%$ vs. $2.8 \% \mathrm{QoQ}$ (share of non-core income in RoA declining back to $0.2 \%$ from $0.7 \%$ ).
Loan growth (ex-corporate) was strong, unsecured lending growth momentum remains strong: Loans grew $18 \%$ YoY/ $6 \%$ QoQ. All segments grew at a healthy pace with CV ( $9 \%$ QoQ/ $26 \%$ YoY), secured WC ( $11 \% \mathrm{QoQ} / 21 \%$ YoY), mortgages (4\% QoQ/ 15\% YoY), tractors (3\% QoQ/ 20\% YoY). Unsecured lending (including PL/ BL/ MFI and credit cards) grew $10 \%$ QoQ and $51 \%$ YoY-now accounting for $11 \%$ of loans vs. $8.7 \%$ YoY, and management aims to raise it to low/ mid-teens. Deposits saw strong momentum with $23 \%$ YoY ( $4 \%$ QoQ) growth, within which SA deposits were flat QoQ ( $2 \%$ YoY) and continue to remain a challenge, especially in the higher ticket size. TD grew 3\% QoQ/ 43\% YoY (TD Sweep - Activ Money grew $+28 \%$ QoQ). CASA ratio continues to decline, currently at $48.3 \%$ from $49 \%$ QoQ \& $56.2 \%$ YoY. Loan to deposit ratio increased from $85.5 \%$ to $86.9 \%$ sequentially with LCR at $120 \%$.
Asset quality remains strong: GNPL/ NNPL/ PCR were 1.7\%/ 0.4\%/79\% respectively and stable QoQ. Restructured loans declined 4 bps to 15 bps of loans and the bank holds 9 bps of loans as contingency provisions. The slippage ratio increased marginally to $1.8 \%$ as compared to $1.7 \%$ QoQ, however, higher recoveries and upgrades brought net slippages down to $0.5 \%$ vs. $0.7 \%$ sequentially.
Subsidiaries reported a healthy performance: Kotak Securities saw strong PAT growth of $45 \%$ YoY with the overall market share improving to $8.8 \%$ vs. $5 \%$ a year ago. Within other lending businesses, KMIL posted strong growth of $62 \%$ YoY and $24 \%$ QoQ. Kotak Life bounced back from a slow 1 Q with PAT growth of $28 \%$ QoQ but still down $9 \%$ YoY. Within the AMC business, AUM grew 28\% YoY.

## Investment Summary

KMB's performance continues to be healthy with a RoA of $2.4 \%$. Even as NIM moderates and credit cost normalizes around 50 bps, we expect RoA of $2.4 \% / 2.1 \%$ and core RoE of $14 \%-15 \%$ over FY24/ 26 E . While we do not foresee a very near-term challenge, the key test for the bank would be sustaining performance in a weaker consumer credit cycle given the late push in unsecured retail assets (unseasoned) and diminishing strength on the liability side. Maintain BUY with SoTP-based TP of INR 2,250. TRUST

## Conference Call Highlights

- NIM compressed 35 bps QoQ. 15 bps was a one-off effect (not expected to occur in coming qtrs.) due to higher liquidity buffers and also to an extent due to ICRR.
- NIM compression largely on account of cost of deposits going up and yields staying stable.
- Cost of funds to increase in the coming qtrs. But the pace would moderate. The average duration of liabilities - 10 to 12 months.
- Majority of the repricing has already been done on the asset side.
- Continues to maintain the highest NIM amongst peer banks.
- Growth to NIM trade-off to be better than growth to credit trade-off.
- Other income was down this quarter on a QoQ basis due to dividend income from subsidiaries of INR 3.1 bn in 1Q.
- Tech costs will continue to occur for the next six months.
- Credit environment is normalizing and credit costs will remain at par with current levels.
- SA balances continue to face pressure, especially higher ticket size a/c balances.
- LCR for the bank stands at $120 \%$, for the group it is $127 \%$.
- Will strive to maintain the CASA ratio.
- Activ money seeing strong growth again this qtr.
- MFI book has crossed INR 1 bn for the first time.
- Seeing strong traction in LAP.
- Credit cards - market share rising on both the number of cards and spends.
- Working capital loans - slow improvement in limiting utilization levels.
- Home loans down due to prepayment and foreclosures.
- Delinquencies in both secured and unsecured book stable.
- Unsecured porifolio has increased to $11 \%$.
- Seeing pricing pressure in SMEs.
- Market share of Kotak Securities increased from $5 \%$ to $8.8 \%$.

[^7]2QFY24 RESULT REVIEW

## JSW Steel

## EBITDA aided by higher volumes and lower costs

JSW Steel's 2QFY24 standalone revenue at ~INR 337.4 bn was ~3\% above our estimate, growing $3.8 \%$ YoY and $2.9 \%$ QoQ, with higher volumes offsetting lower realization. Standalone steel sales volume at ~5.4 MT (6\% above estimate) grew $\mathbf{8 \%}$ YoY and $9.7 \%$ sequentially. Blended steel realization at INR 61,527 per ton (3.1\% below estimate) declined 3.9\% YoY and 6.7\% QoQ. Standalone EBITDA at ~INR 69 bn was $9.2 \%$ above our estimate, materially higher 296\% YoY and 41.9\% QoQ (aided by lower coking coal costs, reduction in iron ore royalty premium on account of lower captive ore production). Consolidated net debt rose 3.6\% sequentially to ~INR 692 bn while net debt to EBITDA improved to 2.52x from the 1 QFY24 level of $3.14 \times$, but still reasonably high in comparison to peers. Steel spreads are expected to be impacted in 2QFY24 with higher coking coal prices coming in with a lag. We roll over our earnings estimate and arrive at a TP of INR 763 at a multiple of $6.5 \times 1$ HFY26 EV/EBITDA. We maintain HOLD rating (as valuations are rich, debt levels are high) and await better entry levels.
Sales volume higher YoY and QoQ aided by domestic sales, inventory liquidation
Standalone steel sales volume at ~5.4 MT (6\% above estimate) grew 8\% YoY and 9.7\% QoQ. Lower exports (fell to $11 \%$ of the sales mix vs. $15 \%$ in 1QFY24) were offset by $18 \%$ sequentially higher domestic sales and 300 KT inventory liquidation. Value-added and specialty products rose to $62 \%$ of sales ( $61 \%$ in 1QFY24). Management reiterated sales guidance for FY24 at 24.2 MT ( $9 \%$ higher YoY).
Lower coking coal costs aid margin; spreads to be impacted in 2HFY24
Blended steel realization at INR 61,527 per ton (3.1\% below estimate) declined 3.9\% YoY and $6.7 \%$ QoQ. EBITDA per ton came in at INR 12,750, materially higher $266.7 \%$ YoY and $29.3 \%$ QoQ, aided by lower coking coal costs (a sequential fall by USD 54 per ton to USD 231 per ton in the quarter) and lower iron ore royalty premium (on account of lower captive ore production). Management expects the improvement in realization could partly offset approx. USD 30 rise in coking coal costs and iron ore costs in 3QFY24 (spot inflated coking coal prices to come in with a lag in 2HFY24).
Foreign subsidiaries' performance muted amidst a weaker economic scenario
The USA plate and pipe mill reported EBITDA of ~USD 26 mn (USD 45 mn in 1QFY24), while the Ohio plant reported EBITDA loss of USD 29 mn (EBITDA of USD 2.6 mn in 1QFY24). Management is apprehensive about Ohio's weak performance in 3QFY24. The Italian subsidiary reported EBITDA of ~EUR 8.9 mn (EUR 18.6 mn in 1QFY24) and is expected to remain range-bound in 2HFY24. Bhushan Power and Steel reported EBITDA of INR 7.4 bn while coated products reported EBITDA of INR 4.1 bn.
Debt rose QoQ primarily on account of the JISPL merger
Consolidated net debt (excluding acceptances) rose 3.6\% sequentially to $\sim$ INR 692 bn (impacted by the consolidation of ~INR 22 bn debt from the JISPL merger) while net debt to EBITDA improved to $2.52 x$ from the 1QFY24 level of 3.14 x , but still reasonably high in comparison to peers. Total capex outlay for FY24 stands at INR 188 bn ( $32 \%$ up from FY23 capex of INR 142 bn ). High capex outlay ( 8.5 mtpa capacity addition in the next 1.5 years, development of iron ore and coal mines, brownfield expansions to further grow to 50 mtpa capacity) could impact deleveraging.

## Investment Summary

Domestic steel demand is expected to grow 8\%-10\% annually aided by strong capex on infrastructure, defence indigenization, and energy transition. 5 mtpa Vijaynagar brownfield expansion and BPSL phase 2 expansion ( 1.5 mtpa ) are expected to be completed by FY24, with incremental volumes coming in FY25 onwards. We roll over our earnings estimate and arrive at a TP of INR 763 at a multiple of $6.5 \times 1$ HFY26 EV/EBITDA. We maintain HOLD rating (as valuations are rich, debt levels are high) and await better entry levels.

[^10]2QFY24 RESULT REVIEW

## Hindustan Zinc

## In-line performance; lower costs offset weaker metal prices

## Hindustan Zinc's (HZ) revenue declined 18.5\% YoY and 6.7\% QoQ to ~INR

 67.9 bn, primarily impacted by lower sales volume and weaker zinc prices. Mined metal production marginally fell YoY and QoQ to 252 KT (effected by lower ore production at Rampura Agucha and Kayad mines, partly offset by better metal grades). Refined zinc production at 185 KT fell ~2\% YoY and 12\% QoQ, while refined lead production at 57 KT was flat YoY and rose $\mathbf{1 2 \%}$ QoQ. EBITDA at ~INR 31.4 bn declined $28.8 \%$ YoY and $6.2 \%$ sequentially (impacted by lower revenue partially offset by cost improvement), was $\sim 3 \%$ below our and 8\% lower than consensus estimates. Cost of zinc metal production, excluding royalty, declined 6\% YoY and 4\% QoQ in INR terms to INR 93,981 per ton. Cost reduction was aided by the softening of thermal coal prices, higher linkage coal availability, and lower specific coal consumption through technological improvement. Adjusted PAT at INR 17.4 bn declined $35.2 \%$ YoY and $11.8 \%$ QoQ. ILZSG expects zinc and lead to remain balanced/ marginally surplus globally. Plausible revival of Chinese domestic consumption, Tara mine shutdown (~40\% of Boliden's metal concentrate output), and Almina-Mias shutdown (~99 KT of zinc, 29 KT lead in Portugal) indicate to some supply tightness. We roll over our earnings estimate factoring in the lower zinc price, higher lead price, and cost guidance leading to a TP of INR 288 at a multiple of 6x 1 HFY26E EV/EBITDA. We maintain HOLD rating as valuations are rich and dividend prospects stands affected.Marginally lower mined metal production; Pyro plant run in lead mode
Mined metal production marginally fell QoQ and YoY to 252 KT with lower ore production at Rampura Agucha, Kayad mines partly offset by better overall metal grades. Refined zinc production at 185 KT fell $\sim 2 \%$ YoY and $12 \%$ QoQ, while refined lead production at 57 KT was flat YoY and rose $12 \%$ QoQ in line with pyro plant operations on lead mode during the quarter. Silver production in 1QFY24 was at 181 tons, marginally up QoQ but down 6.8\% YoY. Management maintained FY24 guidance for mined metal production at 1.08-1.1 MT and silver production at $725-750 \mathrm{MT}$ (additional 30 -ton silver and 7 KT metal recovery is expected through the fumer plant, Rajpura Dariba mill commissioned in 2QFY24).
Cost of production declined YoY and QoQ aided by lower coal prices
The cost of zinc metal production, excluding royalty, declined 6\% YoY and 4\% QoQ in INR terms to INR 93,981 per ton. Cost reduction was aided by the softening of thermal coal prices, higher linkage coal availability, and lower specific coal consumption through technological improvement. For FY24, management believes that the cost of production would be closer to the lower range of the earlier stipulated band of USD 1,125-1,175 per ton.
Aggressive capex, ESG stewardship might affect dividend prospects
The company is currently de-commoditizing its product porffolio, transitioning into a productbased company through 30 ktpa zinc alloy plant (hot commissioning done in 2QFY24), 0.5 mtpa DAP/ NPK fertilizer plant (currently underway), and additional fumers (emphasizing higher silver production). Utilization of operational cash flow for such capex projects and aggressive ESG stewardship could impact potential dividend prospects (gross investments, cash and cash equivalents stood at INR 113.9 bn at the end of 2QFY24, while total outstanding borrowings were at INR 113.2 bn ).

## Investment Summary

The company enjoys low-cost producer advantage (first decile of the cost curve) and product portfolio improvement could support long-term business prospects. ILZSG expects zinc and lead to remain balanced/ marginally surplus globally. We roll over our earnings estimate factoring in the lower zinc price, higher lead price, and cost guidance leading to a TP of INR 288 at a multiple of $6 \times 1 \mathrm{HFY} 26 \mathrm{E}$ EV/EBITDA. We maintain HOLD rating as valuations are rich and dividend prospects stands affected. TRUST

## 2QFY24 RESULT REVIEW

## Havells India

## Lloyd hampers earnings yet again

#### Abstract

Havells India's (Havells) 2QFY24 performance was below our estimates on all fronts; revenue witnessed a growth of $6 \%$ YoY supported by Lloyd (+19\% YoY), however, the core business reported a subdued growth of merely 4\% YoY. EBITDA margin saw a 180 bps expansion to $9.6 \%$ supported by the softening of commodity prices, though it was below our estimates due to a higher than anticipated losses in Lloyd. Over the years, Havells has developed multiple growth levers by expanding its product portfolio in the core light electrical business and venturing into white goods by acquiring Lloyd. This would enable it to remain one of the key beneficiaries if the consumption pick-up theme plays out. Given the higher than anticipated losses in Lloyd and management's focus on gaining market share at the cost of margins, we cut our $\mathrm{FY} 24 / 25 \mathrm{E}$ earnings by $7 \%$ each. Given the rich valuations and competitive pressures leading to a near-term margin squeeze, we maintain a HOLD rating on the stock with a TP of INR 1,359 (44x 1 HFY26E EPS).

Operational performance stands below expectation on all fronts
Havells' overall 2QFY24 performance was below our estimates on all fronts. Revenue stood at INR 38.9 bn ( $+6 \% \mathrm{YOY}$ ), below our estimate of INR 42 bn impacted by weaker than estimated performance in the Core business (ex Lloyd). Although Lloyd reported a strong revenue growth of $19 \%$ YoY, Core business reported subdued $4 \%$ YoY growth impacted by weak demand across categories. Operating profit although reported healthy $30 \%$ YoY growth; it was meaningfully below our estimate of INR 4.7 bn impacted by higher than estimated loss in Lloyds EBIDTA margin improved 180bps YoY to $9.6 \%$ (est. of $11.2 \%$ ) supported by improved margins in the Core business (EBIT margin of $13.5 \%$ vs $11.0 \%$ in 2QFY23) . PAT at INR $2.49 \mathrm{bn}(+33 \% \mathrm{YoY})$, was also below our estimate of INR 3.17 bn . Although demand in the B2B category remains robust, B2C demand remains sluggish and is expected to normalize in the upcoming festive season.
Core business reports muted revenue growth of $4 \%$ YoY due to weak consumer demand
Havells saw its core business (ex-Lloyd) register moderate revenue growth of $4 \%$ YoY to INR 34 bn. Core business revenue growth was supported by sales growth in the Cables \& Wires and Switchgear segments, and demand improvement in B2B businesses. However, change in norms and weak consumer demand led to a $5 \%$ decline in the ECD segment. The Lighting segment was flat YoY despite a decent volume growth impacted by price deflation in LED lighting. Core business EBIT margin expanded 250 bps YoY to $13.5 \%$ supported by margin expansion in Cables \& Wires ( +530 bps YoY to $11.6 \%$ ) and Switchgear segments ( +140 bps YoY to $26.4 \%$ ). However, ECD (flat YoY at $11.6 \%$ ) and lighting (flat YoY at 14.4\%) margins remained stable, leading to an EBIT of INR 4.6 bn ( $+27 \%$ YoY).
Strong revenue performance by Lloyd; manufacturing overheads of new facility broadens losses
Lloyd registered a $19 \%$ YoY improvement to INR 4.9 bn, marginally below our estimate of INR 5.2 bn, however Lloyds reported loss on INR 0.7 bn much higher than our estimate of INR 0.4 bn on account of under absorption of fixed cost aggravated by commissioning of its new facility at Sricity, underutilization of the facility given off season and prevailing competitive pressure.. Havells expects Lloyd's operational performance to improve from 2HFY24 onwards due to a revival in demand, softening of commodity prices, and operating leverage.
Working capital days remain stable
Having repaid its entire borrowings in 1HFY23, Havells is currently sitting on INR 23 bn cash (INR 18.6 bn in FY23). It spent INR 4.1 bn in FY23 on capex and is looking to spend INR 6 bn in FY24. A majority of this capex is allocated towards the Tumkur facility (INR 3 bn) to increase its cables and wires capacity. NWC days for 2QFY24 remain stable at 39 from 36 in 1QFY24 and 42 in 2QFY23.

## Investment Summary

Over the years Havells has developed multiple growth levers by expanding its product porffolio basket in the core light electrical business and venturing into the white goods business by acquiring Lloyd. And this would enable it to remain one of the key beneficiaries if the consumption pick-up theme plays out. We maintain HOLD rating on the stock with a TP of INR 1,359 (44x 1HFY26E EPS of INR 30.9).

## Conference Call Highlights

- Witnessed softness in consumer demand, however, infra and housing demand led to healthy growth in B2B categories.
- Commodity price normalization and product cost-led initiatives to drive further margin improvement.
- The company will focus on small domestic appliances, washing machines, refrigerators, and lighting for the festive season. The company has improved its presence in modern retail and believes it will help the company grow faster.
- International business does have macro tailwinds and the company is taking additional steps and being focused, however, certifications along with other formalities will require 12-18 months. The company expects to scale it up in the next $4-5$ years.
- 1 H has witnessed lower demand due to price hikes.
- Product mix to remain the same between Core and Lloyd.
- Expect a capex of INR 6 bn in FY24.
- Operating leverage will kick going forward with higher volumes. The company has been investing in R\&D, manpower, infra, and IT for the longer term.

## Core business

- Cables and wires - Volume growth was at $10 \%$ YoY. The off-take has been on the underground cables side where the company has a capacity constraint till the next year. $40 \%$ of the revenue in the segment is from underground cables, and the capex will expand this capacity by $25 \%$. In wires, the company has no capacity constraints. Growth in wires has been tepid vs. industrial cables. Channel inventory in wires has normalized.
- Switchgear - Consumer demand weak, industrial very strong. Has a wide range of products that are well placed. No capacity constraints in the segment and expects demand to improve going forward.
- ECD - Expect better demand for premium fans going ahead. Better consumer off-take is expected in 2HFY24 in the segment. The kitchen portfolio is expanding rapidly and new products will be introduced very soon.
- Lighting - Witnessed a decent volume growth; price deflation in LED impacted revenue. But feel it has bottomed out. $65 \%$ consumer lighting and $35 \%$ profession. Consolidation in the segment will be between branded players.
Lloyd
- In Lloyd, the RAC segment has performed better than other products. Under absorption of manufacturing overheads due to the new Sri City facility led to higher losses during the quarter. Expect margin improvement in the coming quarters with improvement in volumes.
- Focus to be to on increasing sales and continue to spend on brand building, etc. The long-term view is to target to be among the top three players. Margins are expected to expand as cost rationalization happens in the medium term.
- Revenue contribution - RAC - $50 \%$ and others - $50 \%$.
- Advertising expenses will remain at $2.5 \%-3 \%$ of revenue.

2QFY24 RESULT REVIEW

## JSW Energy

## Remains on the guided path!

JSW Energy (JSW) reported a consolidated EBITDA of INR 19 bn, up $\mathbf{1 1 1 \%}$ annually. The core EBITDA was INR 11 bn, plus new RE and Mytrah contributed INR 6.3 bn. Merchant power contributed INR 1.9 bn and Hydro INR 1.7 bn. Excluding the seasonality of hydro, the variable component from short-term and regulatory benefits from the existing 6.7 GW portfolio, there is a case for annual EBITDA of INR $9 \mathrm{bn} / \mathrm{GW}$. Thereby, with 10 GW expected to be operational before FY26E, INR 90 bn EBITDA is clearly on the cards. We maintain BUY with a revised TP of INR 488/share (including PVGO of new RE assets and pumped hydro).
Broadly retaining FY24 estimates; lean season for spot market ahead
Going ahead, as Indian spot markets are expected to be weak seasonally, we broadly retain our annual estimates. It is true that in 2QFY24 JSW locked in short-term sales at INR $8.1 / \mathrm{kWh}$-as against the average spot market tariff of INR 5.9/kWh. As we understand, blocks in the evening/ night peak-where solar was not contributing to India's grid, the spot prices were closer to the regulatory cap of INR 10/kWh. To make the situation better, imported coal price during the quarter (benchmark to API 6000GCV) was USD 113/ton, down 65\% YoY. Structurally, RE addition through solar addresses supply only in the morning hours. As India's base and peak demand grows, non-solar hours will see bouts of higher spot prices. Make no mistake: the windfall gains are here for the long haul.
Operationally strong performance
In 1HFY24, JSW generated 15.3 BU, up $22 \%$ YoY. Thermal assets (3.1 GW) generated 8.7 BU, up $11 \%$ YoY. The deemed PLF of 1 HFY24 at Ratnagiri was $96 \%$, Barmer at $74 \%$, and Vijaynagar at $57 \%$. The operational performance of hydro ( 1.39 GW ) was 3.9 BU, down $13 \%$ YoY; solar ( 253 MW ) was 274 MU , up $57 \%$ YoY; and the newly added wind assets ( 216 MW ) at 227 MU .
The transition to 10 GW in CY24, from 6.7 GW now
JSW has committed INR 193 bn for adding 3.4 GW of assets. Till 1HFY24, JSW has spent INR 113 bn.

- SECI IX (810 MW), SECI X (454 MW), and SECI XII (300 MW): SECI IX (810 MW) is likely to be commissioned from 3QFY24 onwards, which has a 25 -year PPA with SECI. Similarly, SECI X (454 MW) has seen a 216 MW commissioning. Finally, SECI XII ( 300 MW ) is likely to be commissioned by March-25.
- Group captive ( $\mathbf{9 5 8} \mathbf{~ M W}$ ): The asset is likely to be commissioned by 3QFY24, with 225 MW already operational.
- Kutehr ( $\mathbf{2 4 0} \mathbf{~ M W}$ ): The plant has a 35 -year PPA with Haryana and is likely to be commissioned by September-2024.
- Ind Bharat ( $\mathbf{7 0 0} \mathbf{~ M W}$ ): Unit 1 is likely to be commissioned in 3QFY24 and unit 2 by 4QFY24.

## Committed to strategy 2.0

JSW will be a 20 GW generation entity by FY30, from 6.6 GW as of now with storage and green hydrogen options. From normalized FY23 EBITDA, JSW aims to grow EBITDA by 3.5$4 x$ and net profit by $3.2-3.75 x$. The net debt/equity will be down to $3.5 x-4 x$ from $4.4 x$ now.
Investment Summary
JSW's RoE remained subdued due to assets of 3 under the commissioning stage. JSW is generating a cash flow of INR 25 bn with $18 \%$ CRoNW. With leverage, JSW aims at INR 750 bn in capex till FY30. The path ahead for strategy 2.0 is clear: backward integration to lower input costs, locked-in sites for lower capex/MW, and the first mover advantage in energy storage. We are including PVGO as the company is about to unlock the platform value for green assets through strategic stake sale. Including PVGO of new RE assets and 2 GWh of PSP, we ascribe a revised SoTP target of INR 488 and recommend BUY.

2QFY24 RESULT REVIEW
Voltas

## EMP provision mars profits yet again, pain to persist for now

Voltas' 2QFY24 operational performance was below our expectations on the profitability front, despite strong revenue booking impacted by yet another provisioning in the EMP segment. Voltas, over the past few quarters, has been struggling on the margin front given severe competition \& soft RAC demand, which has also led to some market share loss in the RAC segment ( $19.5 \%$ vs. peak share of $25.9 \%$ in Aug 2021) and also on account of losses booked in the EMP segment. With the indication from the management that provisioning might continue for another 2-3 quarters we cut our FY24/ 25E earnings by $15 \% / 5 \%$ respectively. We like the RAC under penetration theme from a long-term view and believe that Voltas would be one of the key beneficiaries of the theme. However given premium valuations, we maintain HOLD rating with a SoTP TP of INR 855 and await a better entry point.
Operational performance misses estimate as EMP segment continues to report losses
Voltas reported revenue at INR 22.9 bn ( $+30 \% \mathrm{YoY}$ ) ahead of our estimate of INR 21.1 bn supported by strong execution in the EMP segment ( $+67 \%$ YoY), however, it missed our estimate on the profitability front. EBIDTA for the quarter stood at INR $703 \mathrm{mn}(-30 \%$ YOY $)$ was below our estimate of INR 1.4 bn impacted by weaker than estimated EMP segment performance ($5.3 \%$ vs. est. of $2.5 \%$ ), due to continued provisioning in the international project business to account for delayed collections. Operating margin stood below our estimate at $3.1 \%(-260$ bps YoY, est. of $6.7 \%$ ), largely impacted by higher other expenses ( $13 \%$ vs. est. of $9.7 \%$ ). Adj. PAT stood at INR $357 \mathrm{mn}(-64 \% \mathrm{YoY})$, meaningfully below our estimate of INR 986 mn .
UCP segment performance meets expectations
Voltas' UCP business performance met our expectations on the revenue front as it clocked quarterly growth of $15 \%$ YoY with revenue at INR 12.1 bn (est. of INR 12.6 bn ). Even the margin bounced back and improved by 40 bps YoY to $7.7 \%$ (est. of $7.5 \%$ ) supported by pricing discipline and softness in commodity pricing. Voltas suffered a market share loss of 110 bps (market share of $19.5 \%$ vs. $20.6 \%$ in 1QFY24) given the intense competitive pressure prevailing in the sector. We believe that given the under penetration of RAC, government support in terms of PLI, and pricing pressure easing off given the softening of commodity pricing, the RAC industry will revert back to a strong growth trajectory moving ahead and Voltas would be a key beneficiary of the business trend. Voltas has plans to incur a capex of INR 5 bn over the next two years to set up a backward integrated facility for sub-components under the PLI scheme for RAC.
EMP business continues to reel under losses; pain to continue for another 2-3 quarters
EMP business witnessed a rough quarter, with Voltas reporting a loss of INR 490 mn on account of provisions worth INR 860 mn made due to delays in collection in the international business. This is the fifth quarter over the last six quarters where Voltas has created a provision in the international business. EMP business reported a robust revenue growth of $67 \% \mathrm{YoY}$ to INR 9.2 bn, above our estimate of INR 6.8 bn supported by a strong order book. However, the margin continued to disappoint and stood at $-5.3 \%$ vs. $2.6 \%$ in 2QFY23 (est. of $2.5 \%$ ). The only bright spot for the EMP division was order inflow, which stood at INR 11.2 bn, taking the order book to INR 86.8 bn (2.9x its TTM revenue). Voltas expects the margin to revert to the normal $5 \%$ level in the medium term.

## Investment Summary

We believe the worst seems to be behind in terms of margin erosion for Voltas and operational performance should improve from hereon. We like the RAC under penetration theme from a long-term view and believe that Voltas would be one of the key beneficiaries of the same. However, given premium valuations, we maintain HOLD rating with a SoTP TP of INR 855 and roll over to 1HFY26E EPS.

## Conference Call Highlights

- The rural economy still witnessing muted growth owing to high inflation. The upcoming festive season may help in reviving demand.
- Commodity prices have softened, but still remains volatile. Stabilization in prices should help maintain margins in the future.
- Margins are weak due to the INR 860 mn provision created due to delayed collection in the overseas business.
- The board in its meeting has approved the issuance of listed unsecured non-convertible debentures to the tune of up to INR 5 bn for funding capital expenditure plans.
- FY24 capex to be around INR 5-6 bn covering both, the RAC project as well as the commercial refrigerator project.

## UCP business

- The Onam festival in Kerala led to strong growth in appliances after three years of muted sales. Higher tertiary sales in the upcoming festive season are hence expected.
- The focus on the inverter category and promotion of higher energy-e? cient products has resulted in a healthy product mix contributing to the overall margins.
- Revenue split-RAC $80 \%$, commercial refrigerator $17 \%-18 \%$, and air coolers $2 \%$.
- Voltas continued its leadership in multi-brand outlets with YTD market share of $19.2 \%$, exit August market share of $19.5 \%$, amidst an intensely competitive and fragmented market.
- Commercial refrigeration witnessed muted growth on account of cautious investments by B2B due to lower demand for cold beverages, chocolates, and ice-creams. Retail channel focus and product mix led to strong volume growth on a high base.
- Water cooler demand was buoyant. Air coolers witnessed strong demand in the East and South, however, demand was tepid in North India. Increased channel participation, network expansion, and product launch resulted in $50 \%$ volume growth with an exit market share of $7.7 \%$ (July). Achieved 2nd position in the industry.
- In the commercial AC category, chillers and packaged ACs witnessed good demand. The slowdown in projects will have some impact in the near term, however, the focus on customer retention and retrofit jobs will continue to support growth.
- The strategy continues to remain the same with an equal focus on market share and margin preservation.
- The company witnessed a $15 \%$ YoY growth in the RAC segment. Air coolers (50\%) and sub-commercial refrigerators category, like water coolers and water dispensers performed well. The remaining commercial refrigerator segment had muted growth during the quarter.

## EMP business

- Healthy order book and scheduled execution have resulted in strong growth for domestic projects.
- Order book stood at INR 87 bn. Domestic projects stand at INR 53 bn containing orders across water, HVAC, rural electrification, and urban infra activities. International order book stood at INR 34 bn largely in UAE, Qatar \& Saudi Arabia.
- Focus on collections and certifications has improved the overall working capital and return on capital. The company is also trying to expedite cerrification by engaging with customers and improving collections. The company is careful about taking new international orders to mitigate issues and has put checks and balances in place to avoid problems in this area. New projects will come in at a similar or higher margin.
- Loss of INR 490 mn due to the creation of a provision of INR 860 mn on account of delayed collections in overseas projects.
- All the provisions in the past few quarters have been on a conservative basis, the company is positive on getting reversals here. Provisioning might continue on a conservative basis for another two to three quarters.

## Engineering products

- A customer-oriented approach continued to support Mozambique operations, contributing significantly to results. However, a sluggish iron ore market and a slower pace of infra rollout have muted domestic mining business performance.
- In the textile machinery business, capital machinery rollout from the principles remained positive, although a reduction in yarn prices and acceleration in exports, coupled with supply chain disruption, has lowered the momentum. Focus on the sale of accessories contributed positively to overall performance.

## Voltas Beko

- Crossed a cumulative volume of 4 million units since launch. Fastest to achieve the milestone.
- Volume growth was in excess of $40 \%$ against a muted growth for the industry.
- Revenue share of frost-free refrigerators and automatic washing machines has increased.
- Spending on digital and social media has helped connect with the youth and target customers in an effective manner.
- Increased touch points, leveraging on distribution reach of Voltas. The strategic tie-up with modern trade and e-commerce partners, in addition to the traditional channel, has contributed to achieving much higher volume growth than the industry.
- Market share for refrigerators and washing machines increased by $0.9 \%$ and $1.4 \%$ to $3.3 \%$ and $5.4 \%$ respectively.
- Favorable product mix coupled with localization has resulted in higher gross margin. However, higher advertising spends and spends on BTL activities have resulted in consolidation.
- Target EBITDA breakeven - FY25.

## 2QFY24 RESULT REVIEW

## Laurus Labs

## Inferior business mix drags margins

Laurus Labs (Laurus) reported a 2QFY24 revenue growth of ~4\% on a QoQ basis. However, it fell short of our estimates, largely on account of lower revenue from CDMO and Generic API segments. To our surprise, the CDMO segment showcased a $\sim 10 \%$ sequential decline in revenue, mainly on account of a delay in procurement from its key customer. Despite improvement in revenue on a sequential basis, the EBITDA margin largely remained flat at ~15\%, reflecting erosion in margins in its base business. Going forward, we expect improvement from 4QFY24 onwards on account of pick up in the FDF business via supplies to NACO tenders, improved off-take in other APIs and commercialization of animal health contract. However, we remain skeptical about any significant improvement in margins as ARVs are likely to remain a large portion of Laurus' revenue ( $\sim 40 \%$ ) for FY24 and FY25; we believe gross margin will remain in range of $\mathbf{5 2 \%}$ - $54 \%$.
The large ongoing capex coupled with the weak realization from its base business has resulted in higher opex, which is likely to keep EBITDA margin in the range of $\mathbf{\sim 2 0 \% - 2 2 \%}$ for FY25, we cut our EPS estimate by $\mathbf{\sim} \mathbf{7 \%}$ for FY25. We continue to maintain a HOLD rating on the stock with a revised target price of INR 301 (earlier INR 277), valuing the company at 23x P/E on 1 HFY26 earnings.
Custom Synthesis (CS) - known events are priced in
The CDMO segment reported revenue of INR 2,240 mn declining ~ 10\% sequentially. The decline was on account of deferment in order procurement from its key client. However, Laurus remains confident of recouping in the coming quarters. During the quarter, Laurus' animal health unit has started commercial validation batches, and expects commercial supplies to commence from 4QFY24. We factor in USD 50-60 mn revenue from the animal health contract for FY25 with the value to remain steady in the initial years. The CDMO segment remains the sole growth driver for Laurus, with the business getting diversified between pharma, animal health, and Crop Science commercializing in late FY25. We expect the CS business to grow on a sustainable basis from FY25 with a CAGR of $\sim 25 \%$ over a three-year period (exPaxlovid base).
Generics Formulations (FDF)-remains margin dilutive
The FDF segment recorded $16 \%$ sequential revenue growth; largely on account of higher offtake in ARV tenders also supported by stable developed market sales. During the quarter, LAURUS announced $20 \%$ order win in the NACO tenders for its ARV business. We expect commercial supplies to begin from 4QFY24 with a quantum of $\sim$ INR 2,000 mn . We believe, in order to utilize its excess capacities, LAURUS will continue to participate in low-margin tender business viz. NACO. With the expected regimen change to DLTAF in CY24 we see further risk of decline in ARV tender prices. Besides, there has been a slowdown in approvals from the US market for LAURUS, resulting in a diminishing opportunity size for its ANDAs. On the whole, we expect the formulations business to remain flat on four-year CAGR, on a base of FY22.

## Our View

The quarterly results reflected low margins with an inferior business mix and we believe the transition from ARV to non-ARV/ CS will result in a challenging FY25. Given the adverse business mix and lower tender pricing in the ARV FDF business coupled with higher opex, we expect the EBITDA margin to stabilize at $\sim 23 \%$ for FY25. We also remain concerned about the stress on the balance sheet with a higher Debt/EBITDA ratio of $\sim 2 x$ and a declining RoCE profile, we maintain HOLD rating on the stock.

## Conference Call Highlights

## Operational highlights

- Laurus Labs reported a $22 \%$ YoY decline in revenue in 2QFY24, amounting to INR 12.2 bn . This decline was due to the high base of the previous year resulting from the large purchase order (PO). Adjusting for the purchase order, the revenue grew by $18 \%$ YoY.
- The revenue mix between the ARV and Non-ARV businesses stood at $49 \%$ and $51 \%$ for the quarter.
- Gross margin declined by $\sim 260$ bps YoY to $52.5 \%$ due to changes in the business mix.
- The margin contracted by $\sim 1300$ bps YoY to $15.3 \%$ due to negative operating leverage.
- PAT declined by $84 \%$ YoY to INR 370 mn .
- The company also proposed a dividend of INR 0.4 per share.
- Net debt increased to INR 19.7 bn in Sep'23 from INR 19.2 bn in Mar'23.
- Capex spending for 1 H stood at INR 3.85 bn .
- The R\&D spend for 1HFY24 stood at INR 1.05 bn ( $\sim 4.4 \%$ of sales), driven by the acquisition of intellectual rights for a few gene therapy products from IIT Kanpur.

## Generic API

- The Generic API segment declined by $8 \%$ YoY to INR 6.3 bn, accounting for $51 \%$ of the quarterly revenue.
- The ARV API business witnessed a $9 \%$ YoY decline during the quarter, amounting to INR 3.7 bn . The ARV business maintained a steady momentum in volume, though 2 Q experienced a slight moderation due to cyclicality in ordering, declining $8 \%$ both YoY and sequentially.
- Laurus continues to maintain its leadership position in the first-line HIV treatment-related APIs.
- Onco API recorded a strong bounce back to INR 1.2 bn.
- Other API declined by $38 \%$ YoY to INR 1.4 bn, primarily due to scheduling patterns from customers.
- The CMO order book for other APIs remains healthy, providing visibility. Given the strong order book, the company is building additional capacity in Unit 3 for Onco API.

## Custom Synthesis

- The custom synthesis segment declined by $70 \%$ YoY to INR 2.2 bn, driven by the execution of a large PO the previous year.
- Baseline business (business ex-PO) recorded healthy growth, and the project pipeline continues to scale up.
- The CS segment accounted for approximately $20 \%$ of the quarterly revenue.
- Commercial activity initiated from the animal health site LSPL-U2 began in Oct'23. The company has begun supplying commercial validation batches and expects commercial supplies to commence from 2HFY25. The R\&D center is expected to be operational by the end of FY24.
- The company signed a multi-year commercial contract with a leading global crop science company, further deepening its engagement. Commercial manufacturing is set to begin in 2HFY25.
- The company currently has $60+$ active projects, with 10 in the commercial stage, including three API products.

## Generic Formulations

- The finished dosages segment recorded robust growth, with revenue amounting to INR 3.3 bn, driven by recovery in the ARV FDF business and stable pricing.
- The FDF segment accounted for approximately $30 \%$ of the quarterly revenue.
- ARV FDF business generated INR 1.05 bn in revenue during the quarter.
- The LMIC business remained stable, supported by stable prices, while the developed markets grew, supported by market share expansion.
- The company won $20 \%$ of the NACO ARV tender, marking its first tender from NACO.
- Utilization of the available capacity continues to improve. The management aims to achieve optimum utilization in FY25.
- The company plans to launch two products in the Canadian market in 2HFY24.
- The company expects North America to generate approximately USD 35-40 mn in FY24.
- In 1 H , the company filed 1 ANDA, bringing the cumulative total to 38 , of which 15 have been approved by the USFDA and 13 have received tentative approvals.
- In Canada, the company has filed 21 products, of which 13 have been approved. The company has launched nine products so far.
- In the EU, the company has 14 approved products, while four await approval.
- In the ROW market, the company has filed 61 products, of which 47 have been approved.

## Laurus Bio

- Laurus Bio grew by $44 \%$ YoY to INR 390 mn, driven by traction in the CDMO business along with customer addition.
- Laurus acquired an additional $13.2 \%$ stake in Laurus Bio for INR 720 mn , taking its total ownership to around $88 \%$.
- The downstream expansion at R2 is on track and expected to commercialize from Dec'23.
- The design for the new R3 has been finalized. The new unit will strengthen expertise in $r$ protein.

## Disruptive technology

## - ImmunoAct:

- ImmunoAct received CDSCO approval for NexCAR19 to treat $\mathrm{r} / \mathrm{r}$ Lymphoma/Leukemia indications in Oct'23.
- Laurus increased its stake in ImmunoACT to around $34 \%$.
- Commercial supply of NexCAR19 is set to begin in the coming months.
- The cost to hospitals is expected to be around INR 3 mn per patient, although the cost to customers may vary.
- Immuno-Act has partnered with a Mexican company to begin trials from next year.
- Immuno-Act is also in early talks to in-license the product for the European market.
- The pipeline has two more products, one of which will move to phase 2 in CY24.
- Laurus has two board seats in Immuno-Act while having no control over daily operations.

## - Gene therapy:

- Collaboration with IIT Kanpur to in-license and fund the development of gene therapy assets.
- GLP lab construction work has been initiated for AAV Vectors and gene therapy products.

## Guidance

- FY24 is expected to be a year of consolidation.
- Cost optimization efforts are expected to show results from 2 H , along with a reduction in negative operating leverage.
- The company has allocated a capex of INR 10 bn in FY24.
- R\&D spend for FY24 is expected to be around $4.8 \%$.
- The company plans to prioritize the following in 2HFY24:
- Higher capacity utilization across the network to support growth acceleration.
- Scale-up of the new animal health commercial asset.
- Continuous improvement initiatives.
- Margins are expected to improve with the uptake in the CDMO business.

[^20]
## Risk to our assumptions

- Regimen change in ARV-We anticipate a regimen in ARV segment with a move towards DLTAF to begin from CY24 onwards. The new regimen will have a lower volume of Tenofovir ( 25 mg ) as against current usage ( 300 mg ) per pill. This change is likely to impact API revenue coming from Tenofovir, which will also result in idle capacities as Laurus has $\sim 1,000$ MT of annual Tenofovir capacity and a reduction in revenue contribution from Tenofovir.
- Earlier than anticipated introduction of DOVATO in LMIC-In April 2019, USFDA approved Dovato, a two-drug regimen for the treatment of HIV-1 infection in adults with no ARV treatment history and with no known resistance to the individual components of Dovato. Given that its two-drug regimen with Dolutegravir and Lamivudine, an early adoption of Dovato in LMIC will be a risk to Laurus' ARV portfolio.
- Cabotegravir/ Rilpivirine long-acting injectable for treatment-The USFDA in Jan 2021 approved Cabenuva, which consists of Rilpivirine and Cabotegravir, for treating HIV-1 infection in adults. This therapy is the first once-a-month, long-acting injectable (LAI) for the treatment of HIV.
The patient needs to adhere to the following procedure:
I. For the 1 st month, the patient has to take a lead-in daily dose of one 30 mg tablet of VOCABRIA (oral Cabotegravir) and one 25 mg tablet of EDURANT (oral Rilpivirine).
II. Initiate injections on last day of lead-in daily tablets.
III. CABENUVA contains Cabotegravir and Rilpivirine extended-release injectable suspensions. The recommended initial injection doses of CABENUVA in adults is a single 600 mg ( 3 mL ) gluteal intramuscular injection of Cabotegravir and a single $900 \mathrm{mg}(3-\mathrm{mL})$ gluteal intramuscular injection of Rilpivirine.
We don't think Cabotegravir will be a part of LMIC treatment before CY25 at best. It is important to note that Dolutegravir, which was first approved by USFDA in 2013, was only introduced in LMIC in 2019. And Cabenuva being a first-in-class long acting injectable will see a similar timeline for introduction in the LMIC region. Along with this there will be cost and logistical challenges that will be detrimental in wider patient adoption scenario.

## 2QFY24 RESULT REVIEW

## Kajaria Ceramics

## In-line quarter, demand revival anticipated

Kajaria Ceramics (Kajaria) delivered volume/ revenue/ EBITDA/ PAT growth of 6\%/4\%/39\%/55\% YoY during 2QFY24 amidst a challenging demand environment. EBITDA margin surged 400 bps YoY led by lower gas prices. Key highlights are: 1) The export industry is on track to grow to INR 200-210 bn in size ( $\mathbf{1}$ HFY24 - INR 100 bn), up ~25\% YoY. 2) Domestic demand remained sluggish in 2QFY24. However, signs of revival are visible from Sept'23 onwards ( $9 \%$ YoY volume growth). Anticipating revival in 2HFY24 driven by continued traction in the real estate segment. 3) EBITDA margin stood at $16 \%$ despite higher employee costs and advertising spends. 4) Capex of INR 3.7 bn to be incurred in FY24 (INR 1.6 bn in 1 HFY24). Management reduced FY24 volume guidance to $9 \%-10 \%$ YoY from $13 \%-15 \%$ earlier and maintained margin guidance at 14\%-16\%. Considering a delay in demand revival, we cut our FY24/ FY25 EPS estimates by 6\%/ 10\% respectively and roll forward our valuation to 1 HFY26. Maintain BUY with a revised TP of INR 1,530 (earlier INR 1,500) based on 35x 1 HFY26 EPS. (5-yr. high/ low/ average of 53x/ 15x/ 33x).

Volume grew 6\% YoY in 2Q; FY24 guidance cut to 9\%-10\%
Kajaria reported 2 Q revenue of INR 11.2 bn, +4\% YoY. Bathware/ plywood/ adhesive segment revenue grew $15 \% /-21 \% / 38 \%$ YoY to INR $0.8 \mathrm{bn} /$ INR $0.2 \mathrm{bn} / \operatorname{INR} 0.1 \mathrm{bn}$. Tile volume at 26.5 msm grew $6 \%$ YoY. The muted demand scenario continued in $2 Q$ and signs of demand revival were witnessed from Sept' 23 onwards which reported $9 \%$ YoY volume growth. Realization declined $3 \%$ YoY to INR $378 / \mathrm{scm}$ as Kajaria passed on the benefits of reduced gas prices to dealers. Demand is expected to revive from 3Q onwards on the back of strong real estate demand. Management reduced its volume growth guidance to $9 \%$ $10 \%$ for FY24 from $13 \%-15 \%$ earlier. We are factoring in $14 \% / 15 \%$ volume/ revenue CAGR over FY23-26.
EBITDA margin remains stable at $16 \%$
Kajaria's EBITDA grew 39\% YoY to INR 1.8 bn in 2Q. EBITDA margin at $16.0 \%$ expanded 400 bps/ 10 bps YoY/ QoQ. Margin expansion was driven by operating leverage and a reduction in fuel costs. Provision for increments led to increase in employee expenses by 14\% each on a YoY and QoQ basis. Advertising expenses for 1HFY24 stood at INR 0.6 bn (FY24 budget of INR 1.3-1.4 bn). The average gas price for 2QFY24 stood at INR 38/scm (-32\%/ $-3 \% \mathrm{YoY} / \mathrm{QoQ}$ ). Management expects gas costs to remain range-bound at current levels. Management expects better margins in the upcoming quarters driven by operating leverage and has maintained guidance of $14 \%-16 \%$ margin in FY24. It is factoring in savings of $\sim$ INR 1.5 bn ( $\sim$ NR 0.9 bn in 1HFY24) from reduced gas costs which will be partially be passed on to dealers in the form of increased discounts. We have factored in EBITDA CAGR of $27 \%$ over FY23-26E and expect FY24/ FY25/ FY26 margins of 16.4\%/ 17.4\%/ 18.2\% respectively.

## Investment Summary

Demand over the medium term is expected to improve on the back of strong traction in the real estate sector. Switching to cheaper alternate fuel and stable gas prices will aid in maintaining margins in the near term. We maintain BUY rating at a revised TP of INR 1,530 (earlier INR 1,500). TRUST

## Conference Call Highlights

- Outlook: Domestic demand for tiles continues to remain weak. Witnessing gradual pick-up in volume from Sept'23 onwards. Sep' 23 witnessed $9 \%$ YoY volume growth for Kajaria. Expect improvement in the demand environment and better volume growth in 2HFY24 on the back of strong real estate growth. Anticipate higher volume growth in smaller towns.
- Export market: India has emerged as a low-cost production hub for tiles globally. India contributes $\sim 15 \%$ of global tile exports. It is expected that India will be the largest tile exporter (by volume) by FY25. Expect the export industry to reach INR 200-210 bn market size in FY24 (~INR 100 bn in 1HFY24) from INR 160 bn in FY23.
- Guidance: FY24 volume growth guidance has been cut to $9 \%-10 \%$ from $13 \%-15 \%$ earlier. Margin guidance maintained at $14 \%-16 \%$. However, expect margins to be at the higher end of the guidance as 2 HFY 24 margins will be higher than that of 1 H . Targeting INR 1 bn+ turnover in the plywood segment for FY24. Bathware is expected to grow at $+20 \%$ YoY in FY24 on the back of higher growth expected in 2HFY24.
- Margin: 2QFY24 Tiles/ Bathware/ Plywood margins - 16\%/ 9\%/ (2\%) - (3\%)
- Capex: Capex guidance of INR 3.7 bn in FY24 is as follows: 1) 1HFY24 - Sikandarabad expansion ( 3 msm with outlay of INR 1 bn ), Galipur expansion ( 1.92 msm with outlay of INR 0.6 bn); 2) 2HFY24 - Nepal JV Investment (INR 0.9 bn), Kerovit Global (setting up 0.6 mn pieces p.a. sanitaryware capacity (INR 0.8 bn ), corporate office (INR 0.6 bn ), maintenance capex (INR 0.3 bn ). With no major expansions planned, expect INR 2.02.5 bn capex spend for each of the next three years. Sikandarabad and Galipur expansion will aid in the manufacturing of large-size tiles and achieve energy efficiency.
- Capacity utilization: 2QFY24-98\%.
- Gas cost: West/ North/ South/ Blended: INR 33/INR 40/INR 38/ INR 38 per scm. Expect blended gas cost to remain range bound as Kajaria is also using bio fuels. Power and fuel cost savings due to a reduction in gas prices was ~INR 0.9 bn in 1 HFY24 (INR 1.5 bn estimated for FY24 at the beginning of the year).
- Employee costs: The increase in employee costs during 2QFY24 is on account of provisions made for increments. Expect the run rate to continue.
- Advertising spends: FY23/ 1HFY24/ FY24E - INR 1.1 bn/ INR 0.6 bn/ INR 1.31.4 bn.
- Distribution network: The number of dealers stood at 1,840/1950 as of Mar'23/ Sept' 23. Plans to increase the dealers to 2,000 in FY24, of which 500 are expected to be exclusive. Kajaria is expanding its reach in smaller towns and introducing innovative products.
- Regional sales: Tier 1/Tier 2/ Tier 3/ Tier 4-30\%/30\%/38\% / 2\%. Revenue from the North market is $\sim 40 \%$.

## 2QFY24 RESULT REVIEW

## Century Textiles \& Industries

## Real estate on a strong growth path; a blip in paper

Century Textiles \& Industries' (CENT) 2QFY24 quarter highlights were the spectacular response to the newly launched project Birla Trimaya phase 1 in Bengaluru and the dip in profitability in the paper business. On launch, Birla Trimaya sold $\sim 96 \%$ of the inventory valued at INR 4.67 bn . The company has a strong project launch pipeline of INR 65.0 bn in 2HFY24, including Niyaara phase 2 (GDV INR 4.0 bn). On the back of strong demand across markets, spectacular response to Trimaya, and a strong launch pipeline in 2HFY24, we expect CENT to easily surpass sales booking of INR 30 bn in FY24 (guidance for FY24) and INR 50 bn in FY25. Delivery of three projects in 2HFY24 beginning with Alokya, Bengaluru in Oct'23 to see revenue recognition of the real estate segment. The company in 1 HFY24 added projects with GDV of INR 167 bn and is expected to add another >INR 100 bn in 2HFY24. Reiterate BUY with a revised target price (TP) of INR $\mathbf{1 , 3 1 9}$ (previous INR 1,222).
2QFY24 in a nutshell
In 2QFY24, sales booking was at INR 7.08 bn ( $242 \% / 26 \%$ QoQ/ YoY), in line with our estimate of INR 7.0 bn, largely due to a strong response to Trimaya. The collection was INR 2.5 bn ( $-32 \% /-14 \%$ QoQ/ YoY). Paper \& Pulp witnessed a muted quarter on account of muted demand in pulp and lower realization. The pulp and paper segment saw a significant decline in its profitability in this quarter due to a decline in net sales realization (-12\%/-15\% QoQ/ YoY), leading to an EBITDA margin of $10 \%(-800 /-1100 \mathrm{bps}$ QoQ/ YoY). However, as per the company, prices have bottomed out and demand is expected to pick up in 2HFY24, and EBITDA margin expected to revert to $17 \%-18 \%$. Net debt during the quarter went up by INR 3.08 bn to INR 22.43 bn with D/E at 0.58 x . Net debt went up by INR 12.04 bn in the last two quarters due to an increase in business development activities. The company expects net debt to go up by another INR 5.0 bn depending on further business development activities.
Strong launch pipeline spread across geographies
Given new project additions, CENT's launch pipeline has become taller for the remainder of the year and 2HFY24 is likely to witness some interesting launches with a potential booking value of INR 65 bn. Key projects to be launched in 2HFY24 are (a) Birla Niyaara phase 2, which will be of a high ticket size $>$ INR $200 \mathrm{mn} / \mathrm{unit}$ with ~ 150 units and a selling rate of $>$ INR 80,000/sq. ft. (carpet), translating in to potential booking value >INR 40 bn, (b) Rajeshwari Nagar, South Bengaluru project with potential booking value of INR 9.0 bn, (c) The new phase of Birla Navya, Gurugram with potential booking value of INR 10.0 bn; might spill over to 1QFY25, (d) Walkeshwar with booking value of INR 6.0 bn. The remaining new additions, such as - Pune, Sariapur, Bengaluru, and Delhi (cumulative GDV of INR 81 bn) will be launched in FY25; Kalwa Thane (GDV of INR 76 bn) will spill over to FY26. Key monitorable would be the response to the launch of Niyaara phase 2 (in Feb'24). Niyaara 1 has already sold inventory valued at INR 24.7 bn with cost for the entire phase 1 at INR 9.0 bn; it is currently selling at INR 80,000/sq. ft. (carpet). Thus, the successful launch of Niyaara phase 2 would provide strong visibility of future cash flow and provide the impetus and the cash flow for future business development.

## Investment Summary

Management's sharp focus on scaling the real estate business while utilizing surplus cash flows from the steady businesses bodes well for the company. We remain structurally positive on CENT's growth prospect in the medium to long term. We value the company on a SoTPbased valuation, where we assign $5 \times$ EV/EBITDA on 1HFY26 for both the paper and textile businesses factoring in steady growth over the next few years while valuing the annuity leasing segment of Birla Estate at a $9 \%$ cap rate. Residential real estate is valued using the NPV method at a $12 \%$ discount rate. Reiterate BUY on the stock with a revised TP of INR 1,319 (earlier INR 1,222) to factor in an increase in the selling rate of Niyaara and improved sales velocity across markets. Key monitorable remains the response to the launch of Niyaara phase 2 in February 2024.

## Conference call highlights

## Real estate

- Niyaara demand in 2Q has been very strong. Niyaara is selling at INR 80,000/sq. ft. (carpet). $85 \%$ of Birla Niyaara's inventory has been sold to date. Collected INR 7.5 bn and expect tower 2 to launch in 4QFY24. EBITDA margin to be 50\%
- Business development: Strong pipeline of project acquisition with GDV of INR 45 bn. Will add another INR 100 bn in 2HFY24. GDV run rate of INR 250-300 bn every year going forward.
- Trimaya - Sold entire phase 1 inventory with a booking value of INR 4.7 bn.
- Launch pipeline in 2HFY24: Niyaara phase 2, Bengaluru (RR Nagar), Walkeshwar, and Gurugram. Gurugram seeing approval delay by Haryana govt. Gurugram launch may spill over to 1QFY25.
- Revenue recognition: In FY24, 1,600 units are to be delivered in three projects with overall revenue from real estate to be INR 20 bn with a $25 \%-30 \%$ margin.
- Prabhadevi: Not focusing on Prabhadevi as it doesn'† want to cannibalize Niyaara.
- Debt: Existing projects can self-fund on the basis of sales so far. Incremental cash flow is needed for growth. Thus, debt may go up by another INR 5 bn or so for business development.
- Target sales booking of INR $\mathbf{1 0 0}$ bn on track; to reach INR 100 bn in the next four years' time.

## Paper \& pulp

- Prices have remained under pressure but have bottomed out and have seen USD 100/ ton increase in the last two weeks of Sept'23.
- Capacity utilization was high during the quarter.
- Domestic demand and export demand of tissues have remained sluggish in 2QFY24 but have now improved in 3QFY24 due to the festive season.
- Writing paper demand has improved and expect exports to pick up.
- Outlook for 2HFY24 is good. EBITDA margin to be in the $\sim 18 \%$ range.

## Textiles

- Sales are down due to sluggish demand in domestic apparel.
- Focus on productivity and working capital improvement.

## Other highlights

- Employee costs have risen due to appraisal and variable pay.

2QFY24 RESULT REVIEW

## Equitas Small Finance Bank

## Steady earnings growth; asset quality to be monitored

#### Abstract

Equitas Small Finance Bank (Equitas SFB) reported PAT of INR 2.0 bn (4\% above our and consensus estimate of INR 1.9 bn ), 70\% YoY, RoA of 2.0\%. NIM declined 33 bps QOQ to $8.4 \%$ driven by rising cost of term deposits. Management expects the pace of cost increase to moderate in 2 H with the cost of funds expected to reach 7.5\% (2QFY24-7.2\%). Strong loan growth of 32\% YoY and 4\% QoQ drove NII ( $26 \%$ YoY, in line with estimate). Other income was strong with $\mathbf{2 5 \%}$ YoY growth led by $32 \%$ growth in core fee income. Operating expenses grew at 20\% YoY and 2\% QoQ and the cost to income ratio declined marginally to $65 \%$. GNPA stayed flat sequentially ex-ARC sale of INR 1.6 bn (INR 1.2 bn in recoveries). However, slippages increased to INR 2.6 bn ( $4.7 \%$ of last year's opening loans) driven by the weak vehicle finance segment, leading to net slippage ratio (ex-ARC sale) rising to $1.7 \%$. We expect RoA of 2\%-1.9\% and RoE of 15\%. We roll forward to FY26 and increase our TP to INR 105 at (1.7x 1 HFY26 P/BV) from INR 90, maintain HOLD.

Steady quarter despite continued NIM contraction
NIM contracted 33 bps QoQ ( 34 bps decline in 1QFY24) on account of an increase in the cost of funds by 27 bps QoQ to $7.21 \%$ ( 33 bps increase in 1QFY24). The CoF increase was largely driven by term deposit costs rising 46 bps to $7.9 \%$ vs. 44 bps in 1QFY24. Management believes that the pace of cost of fund increase will moderate in 2HFY24 and it is likely to be $7.5 \%$ by year-end. NII grew $26 \%$ YoY ( $3 \%$ QoQ), in line with estimates. Fees grew $32 \%$ YoY led by both asset and liability-related fees. Fee income would pick up in 2 H as disbursement activity increases. Other income grew $6 \%$ QoQ \& $25 \%$ YoY. Cost growth moderated QoQ to $2 \%$ as 2 Q generally sees higher employee costs on account of salary hikes and incentive payout. Costs as a percentage of average assets stood at $6.3 \%$ vs. $6.6 \%$ QoQ with cost to income ratio declining 74 bps to $65.1 \%$. Core PPP grew $42 \%$ YoY ( $3.0 \%$ of average assets) and credit cost stayed below $1 \%$. Overall RoA was strong at $2.0 \%$, with this being the 4 th consecutive quarter with $+2 \%$ RoA. The bank clocked a RoE of $14.6 \%$ in 2QFY24 with Tier 1 at $20.6 \%$.
Strong deposit growth driven by retail term deposits
AUM grew 37\% YoY and 6\% QoQ while net loans grew 32\% YoY and 4\% QoQ, led by 29\% YoY growth in disbursements. Disbursements were strong across the board on YoY \& QoQ basis except for MFI. Deposits witnessed strong growth of $11 \%$ QoQ and $42 \%$ YoY led by strong growth in retail term deposits ( $61 \%$ of overall TDs) at $31 \%$ QoQ and $80 \%$ YoY-with the blended cost of term deposits at $7.9 \%$ (peak term deposit rate offered was $9 \%$ ). With a majority of the old deposits at lower rates being replaced at higher rates, management expects further increase in interest costs but the pace of increase is likely to moderate over the next two quarters. SA declined $3 \% \mathrm{QoQ}$ with the blended cost of saving deposits at $6.17 \%$. CASA ratio declined further to $33.6 \%$ vs. $38.4 \%$. CASA as a $\%$ of total deposits and borrowings is now at $28.8 \%$ vs. $32.2 \%$ QoQ.
Slippages higher QoQ driven by weak vehicle finance
GNPL \& NNPL declined 48/ 21 bps QoQ to 2.1\%/ 0.9\%. Excluding the INR 1.2 bn recovery component from the sale of ARC of INR 1.6 bn , GNPL would have been flat. The bank made additional provisions of INR 0.28 bn maintaining PCR at $57.7 \%$ (the bank aspires to reach $70 \%$ in 2 years). GNPA within vehicle finance \& MFI increased sequentially to $2.4 \%$ \& $2.2 \%$ vs. $2.3 \%$ \& $2.5 \%$. Slippages increased to INR 2.6 bn ( $4.7 \%$ of last year's opening loans) driven by vehicle finance. Net slippage ratio (ex-ARC sale) increased to $1.7 \%$ (vs. $1.5 \%$ in 1QFY24).

## Investment Summary

Equitas SFB is one of the few small finance banks that has a diversified product offering and should continue to benefit from cyclical recoveries in some of the segments it operates, in the form of better growth rates and low credit costs. However, the strength of liability franchise (ex-interest rates), cost growth, and credit quality needs to be monitored. We expect RoA of $2 \%-1.9 \%$ and RoE of $15 \%$. We increase our TP to INR 105 from INR 90 partially due to better earnings expectations and on account of roll forward to 1 HFY 26 valuing the company at $1.7 \times$ PBV ( $1.6 x$ earlier).

## Conference Call Highlights

- Strong activity being witnessed across sectors with all lead indicators showing healthy growth.
- Credit momentum to continue for the remaining year as well and would end the year at $25 \%-30 \%$ advance growth.
- Pace of Cost of funds increase to moderate in 2 H . Management believes CoF to rise to 7.5\% by year-end.
- NIM drop is also expected to moderate in the 2nd half of the year.
- The bank stands to benefit if interest rates continue to remain steady as $85 \%$ of the loans are on a fixed rate basis.
- Fee income is expected to increase in 2 H with higher disbursement activity.
- Credit cycle to remain benign for the rest of the year. Aiming for 70\% PCR in the next two years.
- Sale to ARC amounted to INR 1.62 bn, within which INR 1.18 bn is coming in from recoveries and INR 0.44 bn from write-offs.
- Cost to income ratio may improve gradually in the 2nd half as income builds up. However, it would hover around $63 \%-64 \%$ levels for the next two years.
- Management continues to focus on CASA mobilization despite continuous decline.
- CET1 remains strong at $+20 \%$. Not included PAT for 1 H in CET1 calculation as per RBI guidelines.

## 2QFY24 RESULT REVIEW

## South Indian Bank

## Core profitability was impacted by higher costs

South Indian Bank (SIB) reported PAT growth of 23\% YoY at INR 2.7 bn, higher than our estimate of INR 2.2 bn (RoA of 1\%) as (1) Provisions were lower at INR 0.5 bn as against our expectation of INR 1.2 bn and 2) Other income being high at INR 3.6 bn as against the expectation of INR 2.7 bn led by strong fees and healthy treasury income. Reported NII increased by 14\% YoY/3\% QoQ led by a lower than expected decline in NIM (-3 bps QoQ). As highlighted by management, 2/3rd of the deposits are expected to re-price over the next two quarters, which may keep deposit costs high and could thus impact NIM negatively. Fee income growth was strong at 14\% QoQ despite which core PPP declined $12 \%$ YoY ( $15 \%$ below expectation) as opex was high at 7\% QoQ on account of staff cost increase of 3\% QoQ and other cost increase of 12\% QoQ. Loan growth was soft at 1\% QoQ/ 10\% YoY and slippage ratio improved from $3 \%$ to $1.9 \%$ QoQ. CET I stood at 13\%. We increase our FY24/ 25 earnings by 8\%/ 1\% respectively and introduce FY26 estimates. Maintain HOLD with a revised TP of INR 25 based on 1 HFY26 PBV of 0.6x, and expect RoA of $0.7 \%-0.8 \%$ and RoE of $12 \%-14 \%$ in FY26E.
Core profitability was impacted by high costs: NII grew $14 \%$ YoY/ 3\% QoQ, 4\% higher than the estimate, as NIM decline was lower than the expectation at 3 bps QoQ. Yield during the quarter increased by 14 bps which has offset the impact of the 16 bps cost of funds increase. Management stated that 2/3rd of the deposit book is yet to re-price over the next two quarters and drive the cost of funds higher. Fees grew $21 \%$ YoY but opex growth was higher than the estimate at $31 \%$ YoY, within which employee costs grew $27 \%$ YoY. This led to core PPP decline by $12 \%$ YoY ( $15 \%$ lower than the estimate). Provisions reduced $74 \%$ QoQ. PAT grew $23 \%$ YoY and RoA came in at $1 \%$ ( $0.7 \%$ in 1QFY24).
Slippage ratio declined sequentially with NIL corporate slippages: The bank reported slippages of INR 3.2 bn (annualized slippage ratio of $1.9 \%$ vs. $3.1 \%$ in 1QFY24). This was led by NIL slippages in the corporate segment and SME slippages declined from $5.8 \%$ to $4.2 \%$ QoQ. GNPL/ NNPL ratios declined from $5.1 \% / 1.9 \%$ in 1QFY24 to $5 \% / 1.7 \%$ respectively in 2QFY24. The bank had taken a provision of INR 380 mn in 1QFY24 on the card porffolio, which has reversed during this quarter, leading to a decline in provision of $74 \% \mathrm{YOY}$. Credit cost for the quarter stood at $0.4 \%$ as compared to $1.4 \%$ QoQ. Restructured loans declined a further $11 \%$ QoQ and stood at $1.6 \%$ of loans. Total stressed loans including (NNPA + restructured loans + SR) declined from $3.9 \%$ to $3.5 \%$ QoQ. CET 1 ratio was at 13.2\%.

Loan growth was soft due to a marginal QoQ decline in SME and corporate loans: Gross loans grew $1 \%$ QoQ ( $10 \%$ YoY) driven by the retail segment ( $2 \%$ QOQ) and SME \& corporate portfolio's growth of - $0.3 \%$ QoQ ( $10 \%$ YoY). Retail book growth was led by the unsecured segment (PL + CC grew 13\% QoQ) and housing book growth of 2\% QoQ. Gold loans increased 4\% QoQ/ 16\% YoY led by agri gold book growth of 5\% QoQ. Deposit growth was at $2 \%$ QoQ/ $10 \%$ QoQ led by TD growth of $14 \% \mathrm{YoY} / 3 \%$ QoQ, while CASA remained impacted and the CASA ratio stood at $32 \%$ (vs. $33 \%$ in 1QFY24).

## Investment Summary

SIB's overall performance was decent and though the core performance has improved as compared to the past, bottom-line volatility remains high. We need to keep watch on the new MD's strategy and execution over the near term. We maintain HOLD rating on the stock with a revised TP of INR 25, based on $0.6 \times 1 \mathrm{HFY} 26$ PBV.

2QFY24 RESULT REVIEW

## Kirloskar Pneumatic Company <br> Another soft quarter

Kirloskar Pneumatic (KKPC) reported lower than estimated operational performance in 2QFY24. The company registered a revenue decline of 5\% YoY on account of lower exports and also a 230 bps contraction in EBITDA margin due to a one-time employee settlement expense of INR 40 mn and high CSR expense amounting to INR $12 \mathbf{m n}$ during the quarter. The company has received orders worth ~INR 4.1 bn and witnessed a pick-up in the ordering of booster compressors leading to a record order book of INR 14.5 bn. Although INR 8.5 bn of this order book is executable only in 2HFY24, reluctance in accepting delivery by customers is hampering the company's revenue booking potential. We therefore cut our earnings estimate for FY24/ 25E by 16\%/ $11 \%$ respectively.

We believe KKPC has multiple growth drivers: a) Market share gains in the screw and centrifugal compressor segment; b) Strong traction in the gas compressor segment, supported by CGD network development; c) Traction in export orders with the highest revenue booking of INR 1.77 bn in FY23, which can help the company deliver $+19 \%$ revenue CAGR and achieve its INR 20 bn revenue target by FY26E. We maintain BUY rating with a revised TP of INR $\mathbf{7 3 3}$ valuing the company at $\mathbf{2 4 x}$ its $\mathbf{1}$ HFY26E earnings.

2QFY24 result highlights

- Revenue at INR $2.82 \mathrm{bn}(-5 \% \mathrm{YoY})$ stood below our estimate of INR 2.45 bn , impacted by lower export sales (INR 270 mn vs. INR 430 mn in 2QFY23; -51\% YoY).
- Gross margin stood at $45.9 \%$ (+1.5 pps YoY), above our estimate of $44 \%$ supported by a shift in revenue mix from projects to products.
- EBITDA stood at INR $317 \mathrm{mn}(-20 \%$ YoY $)$, below our estimate of INR 475 mn . EBITDA was impacted by a one-time employee settlement cost of INR 40 mn and a CSR cost of INR 12 mn during the quarter-under the non-reportable segment.
- EBITDA margin stood at $11.2 \%$ ( -230 bps YoY), below our estimate of $14 \%$ impacted by higher employee cost (\%) at $15.7 \%$ vs. est. of $11.5 \%$. Compression segment margin stood at $18.1 \%$ (+20 bps YoY).
- Other income stood at INR 42 mn vs. INR 44 mn in 2QFY23. (est. of INR 31 mn ).
- Tax rate was $24.8 \%$ vs. $24.2 \%$ in 2QFY23.
- PAT stood at INR $202 \mathrm{mn}(-26 \%$ YoY), below our estimate of INR 306 mn .
- Order book stood at INR 14.5 bn (+21\% YoY). Order inflow stood at INR 4.1 bn (+52\% YoY).

## Investment Summary

KKPC is amongst the oldest players in the compressor market in India and will be a key beneficiary of the massive ordering that is about to take place on account of the CGD network layout where it enjoys a $+50 \%$ market share. Incrementally, it has bridged the product portfolio gap by entering into the rotary screw compressor business, thus increasing its addressable market opportunity and generating a new revenue stream, which will contribute to scaling up its earnings in the medium to long term. Further, KKPC has a strong order backlog of INR 14.5 bn+, which it expects to complete over the next year. This makes us believe that it has the potential to deliver a $19 \%$ earnings CAGR over FY23-26E, which in turn leads to an improvement in its RoE ratio profile from 14\% in FY22 to 19\% in FY26E. We maintain BUY rating with a revised TP of INR 733 ( 24 x its 1HFY26E EPS).

## Conference Call Highlights

- Outlook - Since KKPC is vertically integrated, the geopolitical situation does not affect the supply chain or raw material issue of the company. Additionally, as export is not a significant part of its revenue currently, the company expects to perform well despite these issues due to buoyant demand from the domestic market driven by govt. capex. Finalization of contracts remains a concern in the domestic market as well.
- Revenue - Lower off-take in CNG compressor and decline in export revenue from INR 430 mn to INR 270 mn along with modest execution led to a decline in sales. However, domestic sales growth is expected to drive sales growth in FY24.
- The company is ready with two additional packages in Oct worth INR 600 mn ; expect a strong performance in 2HFY24.
- Revenue bifurcation: Air - ~20\%, refrigeration-25\%-30\%, gas - $40 \%-45 \%$.
- Revenue bifurcation: Project $50 \%$ and products $50 \%$.
- Revenue guidance - Expect to achieve a double-digit growth in FY24. Maintains its guidance of achieving INR 20 bn revenue in two years.
- Gross margin - Change in revenue mix towards products led to higher margins and will be maintained at the same level.
- EBITDA margin - INR 40 mn employee settlement cost along with INR 12 mn CSR spend led to higher unallocable expense and lower margin.
- Order book - Strong ordering of INR 4.1 bn led to an all-time high order book of INR 14.5 bn. Although, INR 8.5 bn of orders are executable in FY24, acceptance of delivery by customers remains a concern. INR 6 bn worth of orders will be executed in FY25 from the current order book.
- Order pipeline - Export orders in discussion at INR 8 bn; domestic order pipeline greater than this.
- Compression margin - 18\% will be achieved in FY24.
- Air compressor business continues to grow steadily with screw compressor sales catching up with the reciprocating compressor business supported by the new range of centrifugal compressors (the most efficient oil-free dry-air compressor in the market with lowest cost to market).
- Refrigeration compressor business - Sales from ammonia compressors to cold chains and ice plants continue to grow. Khione compressor scaling has been slow.
- Received significant orders for refrigeration packages from petrochemical and fertilizer plants, which will be executed in FY24.
- Processed gas compressors - There has been a delay in order finalization, which has affected margins. Clearances to install packages were an issue in the past but have witnessed traction Sept onwards. With the stabilization of LPG prices expect significant traction for booster compressors in 2HFY24. These package orders are placed by EPC players executing international projects.
- Aria range of compressors - Targeted for off-the-shelf use and can be used for various purposes. Demand is largely from MSMEs. These are for smart use and are cost competitive.
- Khione compressor - The company underestimated the resistance for scaling up of Khione, but has changed the strategy and expects it to pick up from 2HFY24. Market size of 300-500 compressors/year.
- Turkey order - The company has delivered the entire ammonia compressor order, however, it was a small project. The acceptance of the product was better than expected, however, due to the current market condition the company isn't pushing for additional ordering in the region. Will scale in the future.
- CNG compressor packages - Opportunity of 5,000 stations in the next seven years. Currently, seeing traction in booster compressors as these are in the North Eastern and J\&K regions. These compressors have lower unit costs and are slightly lower in margin (low capex driven). Packages will take time as the infrastructure is yet to be in place, medium-term outlook is still very positive.
- The company expects to deliver 100+ booster compressors in FY24.
- Capex to date stood at INR 280 mn. The forging and fabrication facility in Nashik has been completed.
- Road railer business expected to start getting monetized from 3QFY24 and will help reduce unallocable expenses.
- Sector outlook - Tremendous growth is expected from the capital goods sector driven by the domestic market due to higher localization. Global conditions won't affect the growth trajectory and the sector is well poised for consistent double-digit growth. TREUSTME

[^36]ANTIQUE'S INDIA ECONOMIC MONITOR

## Monetary policy <br> Rates may remain unchanged in FY24

Reserve Bank of India (RBI) released minutes of the monetary policy meeting held on October 4-6, 2023. Key observations made by various members are: a) Domestic growth outlook has improved as compared to the last meeting. Buoyancy in domestic economic activities has helped, particularly due to the revival in investment demand; b) Rising global bond yields, crude oil prices, higher dollar, and volatility in food, energy, and financial markets are the key risks; c) Emphasized the need to achieve 4\% inflation target and the need for monetary policy to remain actively disinflationary to ensure that the ongoing disinflation process progresses smoothly. We believe that the rate cut cycle may resume from 1 QFY25 aligned with the US rate cut cycle and the emergence of clear signs of inflation trending towards the 4\% target. We believe that the possibility of a ~125 bps rate cut in FY25 does exist considering RBI's 2Q-4Q FY25 CPI estimate of $4.3 \%$ and $0.8 \%-1.0 \%$ real neutral rate.

Dr. Shashanka Bhide, Honorary Senior Advisor, NCAER, Delhi

1. RBI's enterprise survey points towards continuous input price pressures in $3 Q$ and $4 Q$ FY24 and the expectation of higher selling prices, particularly in the manufacturing and infrastructure sectors as compared to the services sector.
2. The survey also indicates an expectation of improved demand in $2 \mathrm{Q} / 3 \mathrm{Q} / 4 \mathrm{Q}$ FY24 with relatively higher optimism in the manufacturing sector as compared to the services and infrastructure sectors.
3. On the demand side, investment spending is increasing at a faster rate than consumption, with external demand being a drag
4. Recent consumer confidence of urban households is showing cautious optimism.

Dr. Ashima Goyal, Emeritus Professor, IGIDR, Mumbai

1. Pent-up demand is waning for services but remains robust. Many indicators suggest a revival in private investment post recovery, but some suggest election uncertainties may delay projects. However, this is unlikely in sectors that are close to full capacity with robust demand.
2. There are signs of investment demand revival after more than a decade. In the past, the revival did not sustain due to sharp financial tightening in 2011 and 2017. It is important to sustain it this time, which may persist as there is no excess lending or infrastructure boom.
3. Interest rate rise may not be required unless there are second round effects from repeated supply shocks.
4. Despite the narrower interest rate differential with the US, debt flows continue due to index inclusion in the near term, lower country risk, stable currency, and higher expected growth.
Prof. Jayanth R. Varma, Professor, IIM (A)
5. Willingness to consume at the cost of lower savings demonstrates higher consumer confidence, which may become a self-fulfilling prophecy as robust consumption demand stimulates growth, generates income, and strengthens the household balance sheet. Even if that does not happen, global experience suggests that the debt-fuelled consumption boom may last for several years before petering out. In both instances, the medium term growth outlook looks stronger than the last meeting.
6. The real repo rate based on projected inflation is high enough to glide inflation towards the target within a reasonable period.

## Dr. Rajiv Ranjan, Executive Director, RBI

1. Moderation of services inflation closer to $4 \%$ provides relief as it tends to be stickier as seen in advanced economies.
2. Going ahead, the waning effect of transitory food inflation, ongoing transmission of past monetary actions, improvement in supply chain, probable supply-side intervention by the government, and likely lower rate of increase in selling prices by firms could moderate inflation to $5.2 \%$ by 4 QFY24 and $4.3 \%$ by 4QFY25.

## Dr. Michael Debabrata Patra, Deputy Governor in charge of monetary policy

1. Inflation prints for September and October needs to be monitored carefully to look for the moderation that RBI projections estimate. If we tame inflation durably, then we may see long innings of strong and stable growth.
2. RBI projection estimates that growth will gather momentum from 2 Q onwards. The monetary policy can contribute by remaining sufficiently disinflationary without being overly restraining.

## Shri Shaktikanta Das, RBI Governor

1. The declining core inflation is a key silver lining, supported by declining cost-push pressures and ongoing transmission of past monetary actions.
2. In the current uncertain environment, the monetary policy must remain actively disinflationary to ensure that the ongoing disinflation process progresses smoothly.
3. RBI will maintain a flexible and adaptive approach to liquidity management and undertake open market operations sales if required.
4. Stressed about the need for achieving the inflation target of $4 \%$ and highlighted that the recurring incidence of supply-side shocks brings with them the risk of generalization of inflation impulses, de-anchoring of inflation expectation, and loss of monetary policy credibility.

## Important Disclaimer:

This report has been prepared by Antique Stock Broking Limited (hereinafter referred to as ASBL) to provide information about the company(ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies).
ASBL is a Stock Broker having SEBI Registration No. INZOOOOO1131 and Depository Participant having SEBI Registration No. IN-DP-721-2022(CDSL) registered with and regulated by Securities \& Exchange Board of India. SEBI Registration Number: INH000001089 as per SEBI (Research Analysts) Regulations, 2014. CIN: U67120MH1994PLC079444
ASBL and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group.
This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and ASBL is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that ASBL and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on the profitability of ASBL which may include earnings from investment banking and other business.
ASBL generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover Additionally, ASBL generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing among other things, may give rise to real or potential conflicts of interest. ASBL and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of ASBL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report
Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and, as such, may not match with a report on a company's fundamental analysis. In addition ASBL has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.
Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt ASBL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold ASBL or any of its affiliates or employees responsible for any such misuse and further agrees to hold ASBL or any of its affiliates or employees tree and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent ASBL's interpretation of the data, information and/ or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information herein on reasonable basis, ASBL and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent ASBL and/or its affiliates from doing so. ASBL or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. ASBL or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.

ASBL and it's associates may have managed or co-managed public offering of securities, may have received compensation for investment banking or merchant banking or brokerage services, may have received any compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company in the past 12 months.

ASBL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report
Subject Company may have been a client of ASBL or its associates during twelve months preceding the date of distribution of the research report
ASBL and/or its affiliates and/or employees and/or relatives may have interests/positions, financial or otherwise of over $1 \%$ at the end of the month immediately preceding the date of publication of the research in the securities mentioned in this report. To enhance transparency, ASBL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.
There are no material disciplinary action that been taken by any regulatory authority impacting equity research analysis activities

## Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report. The research analysts, strategists, or research associates principally responsible for preparation of ASBL research receive compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors and firm revenues

## Disclosure of Interest Statement Companies where there is interest

- Analyst ownership of the stock - No
- Served as an officer, director or employee - Yes for Laurus Labs

## Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject ASBL \& its group companies to registration or licensing requirements within such jurisdictions.
For U.S. persons only: This research report is a product of Antique Stock Broking Limited, which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (U.S.) and are not associated persons of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. broker dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with U.S. rules or regulations regarding, among other things, communications with a subject company, public appearances and trading securities held by a research analyst account. This report is intended for distribution by Antique Stock Broking Limited only to "Major Institutional Investors" as defined by Rule $15 a-6(b)(4)$ of the U.S. Securities and Exchange Act, 1934 (the Exchange Act) and interpretations thereof by U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a $6(a)(2)$. If the recipient of this report is not a Major Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any U.S. person, which is not the Major Institutional Investor. In reliance on the exemption from registration provided by Rule $15 a-6$ of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major Institutional Investors, Antique Stock Broking Limited has entered into a chaperoning agreement with a U.S. registered broker-dealer, Marco Polo Securities Inc. ("Marco Polo"). Transactions in securities discussed in this research report should be effected through Marco Polo or another U.S. registered broker dealer
