## ANTIQUE'S MORNING PRESENTATION

## FROM THE RESEARCH DESK

QUARTERIY RESULTS REVIEW
Mahindra \& Mahindra
Broadly in-line operating performances
Steel Authority of India
Lower sales volume impacts EBITDA; inventory build-up raises debt
Oil India
Strong production guidance
Prestige Estates Projects
Another record year on the anvil
National Aluminium Company
Lower than anticipated costs, higher alumina sales drive sharp EBITDA beat

## Arvind Fashions

Resilient performance despite weak demand trends

## Yatra Online

Steady performance; market share gain continues
Solara Active Pharma Sciences
Weak results; another strategy reset

## Global News

- The Dow closed higher Wednesday, as investors bought the dip in stocks, with tech leading the way following a sell-off a day earlier following stronger-than-anticipated U.S. inflation reading. The blue-chip Dow Jones Industrial Average gained $0.4 \%$, or 151 points, while the benchmark S\&P 500 rose $0.9 \%$, the tech-heavy Nasdaq Composite roe 1.3\%
- The Nikkei 225 Index fell $0.69 \%$ to close at 37,700 while the broader Topix Index dropped 1.05\% to 2,585 on Wednesday, with Japanese shares pulling back from 34 year highs and taking cues from a weak lead on Wall Street overnight as hotter-than-expected US inflation data dashed hopes for early Federal Reserve interest rate cuts.

## Sector \& Corporate News

- State-run Coal India plans to start operations at five new mines and expand capacity of at least 16 existing ones to address growing demand for the fuel. India has increasingly relied on coal to address record power demand in recent months, with the rise in coal-fired power output outpacing renewable energy growth for the first time since at least 2019. The world's largest coal miner is set to boost inventories at power plants running on domestic coal.
- Tata Power Renewable Energy Ltd (TPREL) has signed an agreement worth INR 1050 mn with Tata Communications to set up a 18.75 MW captive solar plant in Maharashtra. Located in Aachegaon, Maharashtra, the plant is projected to generate approximately 40 million units (MUs) of power while offsetting more than 30,000 tonne of CO 2 emissions annually.

3QFY24 RESULT REVIEW

# Mahindra \& Mahindra 

## Broadly in-line operating performance

Mahindra and Mahindra's (M\&M) 3QFY24 adj. revenue stood at INR 253 bn, up $17 \%$ YoY, driven by strong auto volume growth. Volumes grew by $11 \%$ YoY while realizations rose $\sim 5 \% / 1 \%$ YoY/ QoQ. Adj. EBITDA margin was 70 bps up QoQ driven by better auto margin and the same was 20 bps ahead of our estimates. Going ahead, we expect continued outperformance in PVs led by consistent strong demand and a robust order book of 226k units. However, the company indicated that 4Q revenue to be flattish. We build in 13\% CAGR volume growth in the UV business over FY23-26. In FES, we expect some moderation in volume on the back of a high base and uneven distribution of monsoon. We expect a low single-digit decline in the tractor business in FY24. We remain positive on the company as we believe the current valuation of core business at 10x FY26E earnings is undemanding. We tweak our FY25/ 26 estimates by 1.5\%/2\% and value the company on SoTP basis to arrive at a TP of INR 1,846 valuing the core business at a PE of 14x FY26 EPS and EV business at a 50\% discount to the deal value (30\% earlier) to factor in the increasing competition in EV space.
Earnings impacted by lower investment income
Adj. revenue stood at INR 253 bn, up $\sim 17 \%$ YoY, led by strong growth in auto volumes at $20 \%$ YoY partly offset by $4 \%$ decline in farm segment volumes. Adj. gross margin was flattish on a sequential basis. Overall, adj. EBITDA margin stood at $12.8 \%$, broadly in line with our estimates. Auto segment EBIT margin came in at $8.3 \%$, down 70 bps QoQ, while farm segment EBIT margin came in at $15.5 \%$, down 50 bps QoQ. PAT came in weak at INR 24.5 bn impacted by lower investment income.
Domestic automotive continues on the growth path
Overall automotive volumes stood at 211 k , up $20 \%$ on a YoY basis, driven by strong growth in its PV segment supported by new launches like the XUV 700, Scorpio N, and Thar. M\&M's open bookings as on 1 st Feb stood at 226k indicating very strong demand for the products, The company is actively working towards mitigating supply-demand mismatch by increasing their capacity to 49 k per month by March' 24 vs . 39 k capacity as of March' 23 . New bookings per month at $\sim 50 \mathrm{k}$ continues to outpace the dispatches currently with a majority of the bookings being for high-end variants driving realization. Further, going ahead, the company plans to launch the Thar 5 door and a facelift of the XUV 300 which should further aid volume growth. Management expects volumes to grow in mid-teens in FY25.
Farm segment to face short-term hiccup
Management has indicated a decline of $\sim 10 \%$ in tractor volumes going ahead in 4QFY24 due to a higher base of last year which was driven by Navratra, however, management is hopeful of better volumes in the medium term driven by increased govt. spending on agriculture, better rainfall conditions, and improving income levels. The export of tractors may go through a longer lead time in the short term due to the ongoing Red Sea crisis, but the company does not see any major impact as long as the event is not prolonged. The farm machinery segment is expected to further drive revenue growth, however, management expects a breakeven on the margin level in the next 12-18 months as volumes grow.

## Investment Summary

We value M\&M on SoTP basis with the standalone business valued at ~ 14x FY26E core EPS and other listed entities valued at a $30 \%$ discount to the current market value while the EV business is valued at a $50 \%$ discount to the deal value, to arrive at a TP of INR 1,846 . We remain positive on M\&M due to its strengthening leadership in the SUV segment, market share gains in UV and FES, and positive outlook for BEV business. We build in the revenue growth of $10 \%$ over FY23-26 led by $12 \%$ revenue growth in the auto segment and $5 \%$ revenue growth in FES.

## Conference Call Highlights

- Demand: SUV revenue market share is currently at $21 \%$ and is number 2 in terms of volume. Cancellation rate at $10 \%$ was higher mainly due to generally higher cancellation rate in December. Deliveries currently at 40k per month and new bookings at 50k per month. The company expects 4QFY24 dispatches to be flattish due to XUV300 ramp down and variant level demand vs. capacity mismatch. The company expects the SUV porffolio to grow by mid to high teens in FY25 ahead of industry growth. The company is not seeing major pressure in rural and semi urban regions for their products.
- Products: Thar continue to be in great demand with the highest waiting period followed by Scorpio. The company has stopped bookings for XUV300 as they will be launching a revamped version. The company is working on bringing down XUV700 model wait period and it has $85 \%$ of the orders for higher end models which is a sort of a bottleneck. Thar 5 door to launch in mid of CY24. EV price went down slightly due to decline in battery prices and competition; the company aims to achieve $25 \%$ market share in the EV segment. The company is not keen on entering hybrid vehicles. It is equally focused on ICE porffolio as well.
- LCV: Market share stood at 49.6\%. In last mile mobility (electric 3Ws), the company is seeing some competition increasing and volumes were 11.6 k for the quarter and market share was $48.5 \%$ for 3QFY24.
- Farm: Gains market share by 80 bps, currently at $41.8 \%$. The company saw weak govt. spending on agri and rural development, which has impacted demand. Farm machinery segment grew by $30 \%$ against target of $40 \%$. Margin for farm stood at $16.5 \%$ and core margin was at $16.9 \%$ (post the $0.7 \%$ impact of World Cup advertising spends). The company saw positive growth for tractors in the festive period, and currently the company is looking at inventory correction as stock levels are slightly higher than the normal 30 days. Farm machinery to break even in $1-2$ years. The company expects 4QFY24 volumes to decline by 10\% YoY. The company expects positive monsoon in FY25.
- Margins and costs: The company expects farm margins to continue in the range of $17 \%-19 \%$ going ahead. It has not seen material impact on the cost front due to the Red Sea crisis as contracts were entered into. Facing some higher lead time for OJA tractors exports.

3QFY24 RESULT REVIEW

## Steel Authority of India

## Lower sales volume impacts EBITDA; inventory build-up raises debt

Steel Authority of India's (SAIL) standalone 2QFY24 revenue at ~INR 233.4 bn was $18 \%$ below our estimates and $13 \%$ lower than the consensus. It declined $6.8 \%$ YoY and $21.4 \%$ QoQ, primarily impacted by lower sales volume. Steel deliveries at 3.8 MT were lower by $\mathbf{8 . 2 \%}$ YoY and $\mathbf{2 0 . 1} \%$ QoQ. Blended steel realization at ~INR 61,274 per ton grew by $1.5 \%$ YoY but fell 1.6\% QoQ. EBITDA at INR 21.4 bn was below our as well as consensus estimates. It grew 3.1\% YoY but declined 44.7\% QoQ (post adjustment of INR 17.3 bn of rail price revision gain realized in 2QFY24, EBITDA was flat QoQ). Adjusted EBITDA per ton came in at ~INR 5,617, higher by $\mathbf{1 2 . 2 \%}$ YoY but declined $30.7 \%$ QoQ. Employee cost at INR 29.4 bn rose by 6\% YoY and fell 6\% QoQ. Imported coking coal cost for 3QFY24 at INR 26,500 was ~16\% higher sequentially (INR 22,750 per ton in 2QFY24) and management expects it to further rise by ~INR 500 per ton in 4QFY24. On a consumption basis, coking coal cost stood at INR 23,600 per ton (only INR 300 per ton higher QoQ) due to the usage of coal dust injection systems in blast furnaces. 616 KT of inventory build-up during 3QFY24 pushed up gross debt by ~10\% sequentially to INR 281.3 bn . The company reported a net adjusted PAT of INR 2.5 bn, sharply higher by 54.4\% YoY but materially lower by 84.6\% QoQ. Higher sales volume in 4QFY24 (typical of steel companies) could help partially offset lower realizations. We maintain HOLD as volume growth prospects remain muted and deleveraging prospects might get impacted, given the capex outlay FY26 onwards. We factor in lower costs FY25 onwards and arrive at a target price of INR 119 (INR 106 earlier) with target 5.5x FY26 EV/EBITDA multiple.
Adjusted steel realization flat YoY and higher QoQ
Adjusted blended steel realization at ~INR 61,274 per ton was largely stable YoY and rose $4.5 \% \mathrm{QoQ}$ (post adjustment of INR 17.3 bn of rail price revision gain, which was realized in 2QFY24). Softening of spot steel prices would impact realizations in 4QFY24. Imported coking coal cost for 3QFY24 at INR 26,500 was $\sim 16 \%$ higher sequentially and management expects it to further rise by ~INR 500 per ton in 4QFY24. Employee cost at INR 29.4 bn rose by $6 \%$ YoY and fell $6 \%$ QoQ. 9MFY24 witnessed a manpower reduction of 2,313 personnel with a further reduction of $\sim 700$ staff due in 4QFY24.
Steel deliveries fell YoY and QoQ; inventory build-up by 616 KT in 3QFY24
Steel deliveries at 3.8 MT ( $\sim 14 \%$ below our estimate) were lower by $8.2 \%$ YoY and 20.1\% QoQ. Crude steel production at $\sim 4.8$ MT was marginally higher YoY and $1 \%$ lower QoQ. Lower sales and stable steel production led to a finished steel inventory build-up by 616 KT in 3QFY24 to about $\sim 1.8 \mathrm{MT}$ at the end of the quarter. Management's earlier guidance for FY24 sales volume at 18.5-19 MT seems improbable (implied 4QFY24 sales volume must be 6-6.5 MT to meet target; 9MFY24 sales stood at 12.5 MT). Higher sales volume in 4QFY24 could help partially offset lower realizations.
Debt rose $10 \%$ QoQ; no major capacity addition in the next three years
Inventory build-up during the quarter pushed up gross debt by ~10\% sequentially to INR 281.3 bn at the end of 3QFY24. Inventory liquidation in 4QFY24 could help lower it. FY25 target capex stands at INR 60 bn. The long-term growth capex plan of INR 1 trn till FY32 (3.0-3.5 MT capacity expansion through debottlenecking initiatives in 3-4 years followed by 4.5 MT Burnpur expansion, 3 MT Bokaro expansion to enhance cumulative capacity to 35 mtpa ) would commence FY26 onwards. Management maintained that no major incremental capacity addition would occur in the next three years.

## Investment Summary

Management expects domestic steel demand to remain steady in FY24. Higher sales volume in 4QFY24 could help partially offset lower realizations. We maintain HOLD as volume growth prospects remain muted and deleveraging prospects might get impacted, given the capex outlay FY26 onwards. We factor in lower costs FY25 onwards and arrive at a target price of INR 119 (INR 106 earlier) with target $5.5 \times$ FY26 EV/EBITDA multiple. TRUST

3QFY24 RESULT REVIEW

## Oil India

## Strong production guidance

Oil India's (OINL) 3QFY24 standalone EBITDA of INR 23.7 bn (-5\% QoQ and $18 \%$ YoY) was in line with our estimate. Adjusted PAT was better at INR 15.9 bn (+30\% QoQ, +22\% YoY) vs. our estimate of INR 13.4 bn due to higher other income. Production at 1.68 MMT (+2\% QoQ, $+4 \%$ YoY) was almost at a new high and marginally higher than our estimates. We continue to maintain net oil price realization of USD 75/bbl for FY24/ 25 and USD 70/bbl in FY26
 performance and aggressive guidance, we increase our production estimates while conservatively still remaining below the company's guidance. Consequently, we increase our FY24/ 25/ 26 EBITDA estimates by $1 \% / 4 \% /$ 7\% respectively. We also increase our valuation for NRL as the refinery expansion nears completion. The stock trades at an undemanding valuation of 2.6x FY26E EV/EBITDA, net of investments. We maintain BUY and increase our target price to INR 591 (vs. INR 474 earlier).

Production continues to be strong
The company's total production was 1.68 MMT ( $+2 \%$ QoQ, $+4 \%$ YoY) vs. our estimate of 1.67 MMT. The company guides to an oil production of 3.8 mtpa in FY25, increasing to 4 mtpa in FY26, and for gas the production guidance is 3.9 BCM in FY 25 , increasing to 5 BCM in FY26. This implies a jump of $19 \%$ and $56 \%$ for gas and oil respectively over FY24 to FY26. Conservatively, we remain at 3.7 mtpa and 3.9 mtpa in FY26 to account for potential delays in well drilling and delay in completion of the North-Eastern pipeline grid which is critical to remove gas offtake bottlenecks. The pipeline is currently $79 \%$ complete with a targeted completion date of Mar' 25 .
Realizations decline marginally as windfall taxes lag
The company reported net crude oil realization of USD 74.34/bbl (vs. USD 75.49/bbl QoQ, USD $77.17 / \mathrm{bbl}$ YoY), lower than USD $75 / \mathrm{bbl}$ as higher export taxes lagged the oil price decline. Gas realization was constant sequentially at USD $6.5 / \mathrm{mmbtu}$.
Opex on a normalized level
The company's opex/bbl for the quarter was USD 13.7/bbl (vs. USD 15.7/bbl QoQ, USD 10.7 YOY ) and is largely in-line with the average for the last three years.

NRL performance strong
NRL recorded an EBITDA of INR $12.2 \mathrm{bn},(+12 \%$ QoQ, $+9 \%$ YoY). Reported core GRM was USD 12.7/bbl (vs. USD 16/bbl QoQ, USD 13.5/bbl YoY). Calculated EBITDA/bbl (incl. excise benefit) came at USD $23.5 / \mathrm{bbl}$ (vs. USD 22.9/bbl QoQ, USD 23.4/bbl YoY). Refinery throughput was 0.85 MMT, representing a $114 \%$ capacity utilization.
Capex targets intact
The company has maintained FY25 capex target of INR 49 bn for standalone and another INR 11 bn towards equity investment in NRL. The total capex for NRL stands at INR 280 bn, of which the actual expenditure till December end is INR 150 bn. The expansion is $55 \%-60 \%$ completed and remains on track for completion by 2 HCY 25 .

## Investment Summary

OINL's production growth remains strong and with IGGL's progress nearing completion, OINL is nearing a stage where growth will not be restricted by offtake bottlenecks. NRL's expansion is also likely to be completed by end-2025 which will make the company an integrated oil company rather than just an upstream company. With stability in gas prices and the oil price environment being relatively strong, earnings certainty and free cash flow generation is strong. We maintain BUY with a target price of INR 591 (vs. INR 474 earlier). TRUST

## Conference Call Takeaways

- A number of new development wells have been drilled which are driving production growth.
- All three phases of IGGL are critical for the company to raise gas production. After phase 1, gas connection till Guwahati will be established. Discussions with customers have begun for selling additional gas.
- $75-80$ wells to be drilled next year compared to 50 this year, which will drive production growth.
- Current run-rate of expenses will remain except for forex loss.
- USD 1.5 bn has been invested till date for Mozambique. Any further borrowing will be done by the subsidiary.
- Exact guidelines for premium APM price are still being worked out by the government.
- NRL excise benefit during the quarter was ~USD 15-16/bbl.
- The additional gas to be produced will not be eligible for NE gas subsidy and buyers will have to pay the entire APM gas price. The company's realization remains the same as APM prices.
- The higher statutory levy costs are on account of interest cost on the amount of GST on royalty not yet deposited with the government. The company has deposited INR 14 bn, but INR 11 bn has not been deposited based on the order by the Guwahati High Court.

3QFY24 RESULT REVIEW

## Prestige Estates Projects Another record year on the anvil

Prestige Estates Projects' (PEPL) 3QFY24 quarter highlight is the strong response to the three new launches in the quarter-The Prestige City, Hyderabad; Prestige Glenbrook, Bengaluru; and Prestige Ocean Towers, Mumbai. They contributed 57\% of sales booking in the quarter. Sales booking in the quarter came in at INR 53.3 bn (-25\%/ 111\% QoQ/ YoY). In 9MFY24, PEPL did sales booking of INR 163.3 bn (up by $\mathbf{8 1} \%$ YoY), which is $\mathbf{1 2 6 \%}$ of sales booking it did in FY23 (INR 129 bn in FY23), surpassing its FY24 guidance of INR 160 bn . The trend of strong responses to newly launched projects indicates the continuing upcycle in the real estate sector. We expect PEPL to surpass pre-sales of INR 200 bn in FY24. The key monitorable, net debt, which witnessed substantial accumulation (INR 28.0 bn in the last eight quarters), didn't see much uptick in the quarter; net debt rose by only INR 198 mn in 3QFY24. However, significant capex projects are in progress (INR 112.7 bn in office and INR $\mathbf{1 6 . 5}$ bn in retail), which would potentially lead to a further increase in debt. We maintain BUY recommendation with a revised SoTP (earlier NAV) target price of INR 1,371 (previously INR 943), valuing the company on a multiple of $7 x$ on implied EV/EBITDA of FY26.
3QFY24 in a nutshell
In 3QFY24, sales booking came in at INR 53.3 bn ( $-25 \% / 111 \%$ QoQ/ YoY) (vs. our est. of INR 50.0 bn$)$. Sales volume was at 5.46 mn sq. ft. ( $-20 \% / 88 \%$ QoQ/ YoY). Collections were steady at INR 31.2 bn (19\%/36\%) in the quarter; INR 84.8 bn ( $20 \%$ YoY) in 9MFY24. 3QFY24 saw the launch of three projects - The Prestige City, Hyderabad; Prestige Glenbrook, Bengaluru; and Prestige Ocean Towers; Mumbai and witnessed a strong response with a sales value of INR 30.4 bn and contributed $57 \%$ of the total sales value. The net debt trajectory moderated in the quarter and increased by only INR 198 mn to INR 69.8 bn with the net debt to equity at $0.60 x$.
Key projects pushed to 1QFY25
Some of the key projects were pushed to 1QFY25 for launches including Prestige Pallava Gardens, Chennai (GDV INR 45 bn); Nautilus (GDV INR 24.4 bn), Mumbai; and Bougainvillea (~ INR 25 bn), NOIDA. However, the company has an unsold inventory of INR 160.0 bn and a few launches in Bengaluru, which would take the run-rate in 4QFY24 >IRN 40 bn. Thus, PEPL expects to easily surpass INR 200 bn in FY24. The company expects to clock INR 25 bn/quarter of operating cash flow (with a lag) from residential business which would fuel capex growth.
Capex projects shaping up well
The company is rapidly expanding its annuity portfolio (office + retail) and aims to achieve an exit rental of INR 39.1 bn by FY28, marking a substantial increase from its FY24 exit rental of INR 7.2 bn. The MMR region is expected to contribute INR 21.5 bn to this total. This portfolio expansion necessitates an additional capex of INR 129.2 bn. Successful execution is crucial, as this significant capex over the next 4-5 years may lead to an increase in debt. Net debt has been rising steadily and has risen by INR 48.1 bn in the last 10 quarters.

## Investment Summary

PEPL's diversification strategy has put the company in a sweet spot to play the ongoing housing upcycle. In addition to its strong presence in three key markets-Bengaluru, Hyderabad and MMR, PEPL is looking to grow its foothold in new markets - NOIDA, Chennai, and Pune. We maintain BUY rating with a revised SoTP (earlier NAV) target price of INR 1,371 based (earlier INR 943), valuing the company on a multiple of $7 x$ on implied EV/EBITDA of FY26refer to page 2 for details. Key monitorable (i) The company's debt trajectory, which is trending upwards; (ii) Execution of its capex projects in MMR and NCR.

## Rationale for implied EBITDA

Currently, we are seeing an exuberance in the realty sector with strong demand from end users across markets. We expect this up-cycle to continue at least for the next few years. In such a strong growth cycle, NAV premiums become highly subjective and NAV calculations do not fully capture the strong volume growth (>10\%). NAV calculations are a good valuation methodology when growth rates are less than 10\%-15\%. Currently, in India, we are seeing strong volume growth as well as price growth, leading to sales booking growth $>25 \%-30 \%$ amongst leading developers. Thus, the stock will trade much above NAV.
With the upcycle expected to continue and companies generating strong cash flows, these cash flows would be reinvested fuelling growth. Consequently, to capture strong growth in valuation we have used implied EBITDA (EBITDA on sales booking expected in FY26) and used a multiple on it. The advantage of this method is that it captures the operational performance and future growth.

## Valuation using implied EBITDA

Aided by strong responses to new launches and aggressive business development velocity, we expect PEPL to do INR 200.0 bn of sales booking in FY24 and to do a minimum 10\% CAGR FY24E-26E.

Table 1: SoTP valuation

|  | FY26E |
| :--- | ---: |
| Sales booking | INR 239 bn |
| Implied EBITDA @25\% | INR 60 bn |
| (a) EV of residential at 7x to EV/implied EBITDA | INR 419 bn |
| (b) Operating office and retail | INR 41 bn |
| (c) Ongoing and upcoming rental assets | INR 108 bn |
| (d) Hospitality | INR 5 bn |
| (e) Net debt (INR bn) | INR 70 bn |
| (f) Equity value ( $\mathrm{a}+\mathrm{b}+\mathrm{c}+\mathrm{d}-\mathrm{e}$ ) | INR 550 bn |
| (g) \# of shares | 0.40 bn |
| (h) Target Price ( $\mathrm{f} / \mathrm{g})$ | INR 1,371 |

[^7]
## Conference Call Highlights

- Highest ever launches in 9MFY24 ( 30 mn sq. ft.) aggregating 11,000 units across various cities. Launched its largest ever project in Hyderabad of over 12 mn sq . ft .
- Under construction and under planning projects is around 170 mn sq . ft.
- Revenue recognition of INR 320 bn to be recognized over three years, assuring INR 100 bn of revenue every year; not considering any new sales.
- Contribution of new launches to sales booking in 9MFY24 was $80 \%$.
- Ocean Towers: Sold almost $40 \%$ of inventory for the tower launched without much marketing. Should be sold out in the next three quarters and only then will launch tower 2.
- Pre-sales geography break-up: Bengaluru is $50 \%-60 \%$; Mumbai INR $3.5-4$ bn; Hyderabad INR 3 bn.
- Upcoming residential project: Potential inventory worth INR 420 bn in terms of upcoming projects. Close to INR 160 bn of unsold inventory, along with upcoming projects can suffice sales booking for the next two years.
Launch pipeline:
- In 4QFY24, to launch Rain Tree Park and Pine Forest in Bengaluru.
- FY25: Launch of NCR project got delayed to 1QFY25. Nautilus pushed to 1QFY25. Pallava Gardens in Chennai has been approved by CNDA, expect to launch in 1QFY25.
- Pipeline in Mumbai: Big project in Jijamata Nagar of 17 acres. Looking at more land parcels in Mulund and Andheri. Further, signed a term sheet in Pune.
- BKC commercial project: Financial closure will be updated in the next two weeks.
- Business development: Exploring few land parcels in Bengaluru and NCR. 60\% would be outright and $40 \%$ JDAs. To maintain BD run-rate of INR 8-8.5 bn every quarter.
- Maintain guidance of sales booking to surpass INR 200 bn in FY24 driven by new launch and sustenance sales in 4QFY24.

3QFY24 RESULT REVIEW

## National Aluminium Company <br> Lower than anticipated costs, higher alumina sales drive sharp EBITDA beat

Nalco's standalone revenue was $8 \%$ above our and $4.5 \%$ above the consensus estimates at INR 33.5 bn, rising 1.5\% YoY and 10\% QoQ, primarily aided by higher alumina sales and stronger alumina prices. Alumina sales volume of approx. 343 KT grew by 19.5\% YoY and sharply higher by $\mathbf{5 2 . 1} \%$ QoQ, while aluminum sales volume estimated at 114 KT was flat YoY and lower by $3 \%$ QoQ, with sequentially higher alumina exports and lower aluminum export deliveries. EBITDA at INR 7.7 bn jumped by $\mathbf{6 6 . 1} \%$ YoY and 95\% QoQ; it was sharply above our and consensus estimates. Aluminum segment EBIT at INR 4.8 bn materially rose $68.8 \%$ YoY and $137.4 \%$ QoQ, while alumina segment EBIT at ~INR 2.2 bn spiked up by $240.3 \%$ YoY and 94.6\% QoQ. Adjusted PAT at INR 4.9 bn grew by 78.4\% YoY and shot up $136.8 \%$ QoQ. Alumina volumes are expected to remain strong in 4QFY24. We maintain BUY rating, incorporate lower costs (power and fuel cost reduction of 9\%/7\%/6\% in FY24/FY25/FY26 driving EBITDA up by 13\%/8\%/ 9\%) and revise our target price to INR 166 (earlier INR 142) at a higher target multiple of 5.5x FY26E EV/EBITDA (earlier 5x FY26).
Aluminum segment performance aided by lower costs
9MFY24 witnessed strong operational performance with aluminum production/ sales at 345 KT/ 349 KT (the highest since inception). Aluminum segment EBIT at INR 4.8 bn materially rose $68.8 \%$ YoY and $137.4 \%$ QoQ, primarily aided by lower than anticipated power and fuel costs and QoQ stronger LME aluminum prices. Average realization, which was at USD 2,442 per ton, fell $5.1 \%$ YoY but was up by $2 \%$ QoQ. Aluminum sales volume estimated at 114 KT was flat YoY and lower by $3 \% \mathrm{QoQ}$, with sequentially lower aluminum export deliveries. The average spot aluminum LME price in 3QFY24 was at USD 2,194 per ton, lower by $6.1 \%$ YoY but higher by $1.6 \%$ QoQ. Power and fuel costs at INR 8.5 bn declined $23 \%$ YoY and $19.2 \%$ QoQ (aided by lower coal costs and ramp-up post the commencement of captive coal mining at Utkal block D). Personnel cost at INR 4.4 bn also fell by $6.4 \%$ YoY and $3.1 \%$ QoQ. Higher alumina sales drove sharp improvement in the Alumina segment
Alumina segment revenue at INR 14.1 bn grew by $11.6 \%$ YoY and $13.6 \%$ QoQ. Segment EBIT at ~INR 2.2 bn spiked up by $240.3 \%$ YoY and $94.6 \%$ QoQ. Alumina sales volume of approx. 343 KT grew by $19.5 \%$ YoY and sharply higher by $52.1 \%$ QoQ. Average global alumina prices for 3QFY24 at USD 334 were higher by $4.5 \%$ YoY but flat sequentially. Alumina volumes are expected to remain strong in 4QFY24.
High margin of safety with attractive dividend yield and high cash levels
Cash and cash equivalents at the end of FY25 are projected at INR 39.3 bn, translating into $\sim 14 \%$ of its current market capitalization. The company declared a second interim dividend of INR 2 per equity share for FY24 (with a record date of February 23, 2023). This is in addition to an earlier interim dividend of INR 1 per equity share (declared in November, 2023). We expect the dividend yield to sustain at $\sim 3-4 \%$ over FY24-25.

## Investment Summary

We remain positive on Nalco in view of the stable alumina and aluminum price outlook (supported by supply tightness), integrated business model, and attractive dividend yield. Nalco sells $\sim 1.3$ MT of alumina and $\sim 0.4$ MT of aluminum annually and is well positioned to benefit from their strong prices. An additional 1 mtpa alumina (flowing in FY26 onwards, post commissioning) along with captive coal mining (benefits have already started accruing) and caustic soda production would drive margin expansion and cost reduction. We maintain BUY rating, incorporate lower costs (power and fuel cost reduction of 9\%/7\%/6\% in FY24/ FY25/FY26 driving EBITDA up by $13 \% / 8 \% / 9 \%$ ) and revise our target price to INR 166 (earlier INR 142) at a higher target multiple of $5.5 x$ FY26E EV/EBITDA (earlier 5x FY26).

[^11]3QFY24 RESULT REVIEW

## Arvind Fashions

## Resilient performance despite weak demand trends

Arvind Fashions' (AFL) 3QFY24 performance was ahead of our estimates with comparable revenue growth of $5 \%$ driven by casualization and strength in the winter portfolio. Profitability improvement was better due to lower discounting along with a higher contribution from the retail channel. During the quarter, retail LTL grew $2 \%$ owing to sharper execution and lower discounting while the MBO channel grew $+15 \%$. Gross and EBITDA margins improved by 610 bps and 249 bps YoY. AFL added 31/ 122 stores during 3QFY24/ 9MFY24 and maintains its guidance of adding 200 stores, largely through the FOFO model. Despite weak demand trends, AFL would be able to drive growth due to a very strong portfolio of brands in the fast-growing casual wear category backed by an experienced management team. Profitability is also expected to improve with better inventory management, operating leverage, and aggressive expansion through the franchise model. Post 3QFY24 results, we have marginally tweaked our estimates and we expect AFL to deliver revenue/ EBITDA/ PAT growth of 8\%/ 19\%/ 53\% CAGR over FY23-26E with improvement in return ratios and cash flows. We maintain BUY recommendation with a revised target price of INR 600, based on 10x FY26E EV/EBITDA (implying 13x pre-IndAS FY26E EV/EBITDA).
Comparable revenue grew $5 \%$ driven by casualization \& winter wear
AFL reported a revenue decline of $5 \%$ to INR 11.2 bn, impacted by the sale of Sephora business. Adjusting to discounted businesses (Sephora, Ed Hardy, and Aeropostale), comparable revenue grew $5 \%$ driven by casualization \& winter wear strength despite conscious delay of EOSS. Retail LTL grew $2 \%$ owing to sharper execution and lower discounting while the MBO channel grew $15 \%$ YoY. Online D2C business doubled while B2B witnessed decline. Notably, during the quarter kids' wear grew $15 \%$ YoY and women's wear showed good traction. Management highlighted that demand trends continue to remain soft and an improvement is expected by 1QFY25. AFL's strategy is to focus on five brands to drive longterm growth through premiumization and scaling up casualwear and accessories offerings.

During the quarter, AFL added 31 stores (gross addition) and 122 stores for YTD, taking the total store count to 1,199 . The company intends to open 200 stores largely through the assetlight model of FOFO.
Profitability improved on a higher full price sell-through and better mix
Gross margin improved by 610 bps YoY to $53.3 \%$. Comparable gross margin improved by 480 bps YoY due to lower discounting along with a higher contribution from the retail channel. During the quarter, employee costs remained unchanged while the other expenses grew 6\% YoY. Notably, AFL has increased A\&P spends by 150 bps YoY. EBITDA grew 19\% YoY to INR 1.43 bn with a margin expansion of 249 bps YoY to $12.7 \%$. Reported PAT grew $64 \%$ to INR 363 mn while PAT (after minority interest) doubled to INR 163 mn .

## Investment Summary

Post 3QFY24 results, we have cut our EBITDA estimates by 2\%/ 2\%/ 1\% for FY24/ FY25/ FY26 factoring near-term weakness in demand trends. We are optimistic about the company on account of a) The strong industry tailwinds, especially the casual apparel market; (2) Its strong brand portfolio comprising of mature brands, with its ability to generate stable cash flows; and 3) Various corrective actions taken in the last 18-24 months to improve supply chain and working capital, which should help drive long-term value. We maintain BUY recommendation with a revised target price of INR 600, based on 10x FY26E EV/EBITDA (implying $13 x$ pre-IndAS FY26E EV/EBITDA).

## Conference Call Highlights

- The growth was impacted due to a decline in online B2B channels. During the quarter, Retail and MBO channels grew $2 \%$ and $+15 \%$, respectively.
- The decline in the online channel would continue for one more quarter due to the clearing of inventory on B 2 B platforms. Post which the channel should start reporting growth. During the quarter, B2C (market place and company website) channel sales have doubled.
- During the quarter, festive season sales were impacted due to the India World Cup matches during the weekend.
- AFL did not participate in early discounting due to tighter inventory management. AFL is focusing on profitable growth.
- The company has increased advertising spends by 130 bps YoY.
- Growth of MBO is led by distribution expansion and healthy LTL growth.
- Lower discounting led to a $1 \%$ improvement in profitability.
- Flying Machine brand refreshment continues and early signs of recovery are visible.
- Retail channel LTL growth could be $5 \%-7 \%$ with the recovery in demand trends. The company is investing in brands and EBO expansion.
- The company has differentiated five brands with very unique positioning.
- Large format store ( $4,000 \mathrm{sq}$. ft .) locations are carefully decided and the company would be very selective about opening large format stores.
- Tommy Hilfiger store addition would be on the COCO model while other brands largely would be on the FOFO model.
- Adjacencies contribution for US Polo is $15 \%$ of revenue and it is growing very rapidly.
- Gross margin is sustainable due to benign cotton prices and lower discounting.
- YTD capex is INR 610 mn . The capex for the full year would be INR $800-850 \mathrm{mn}$. The company is focusing on the franchise model.
- The company is aiming at $+20 \%$ RoCE, which would be achieved with a margin improvement of 100 bps every year.
- The US Polo kids wear category has grown at $20 \%$ during the quarter.
- Gross debt is around INR 3.5 bn and net debt is INR 2.25 bn.
- Ed Hardy and Aeropostale are dormant brands and the company is not doing any sales. The company has taken a provision for future obligation of royalty payment (INR 390 mn ) for the coming years.
- Growth is highest for Tommy Hilfiger and Calvin Klien, and lowest for Flying Machine.
- The company plans to open 200 stores on an annual basis, out of which many will be in the EBO format.
- Premium products of US Polo and Arrow also performed well.

3QFY24 RESULT REVIEW

## Yatra Online

## Steady performance; market share gain continues

Yatra Online's (YATRA) 3QFY24 highlights are the market share gain in the air ticketing segment and strong growth in gross bookings. Despite the subdued corporate business activity due to seasonality, YATRA witnessed an $18 \%$ YoY increase in gross bookings to INR 18.6 bn. Revenue came in at INR 1.1 bn ( $\mathbf{2 3 \%}$ YoY/ 17\% QoQ). EBITDA was at INR 36 mn. During the quarter, YATRA acquired 26 new corporate accounts with an annual billing potential of INR 2.2 bn. In 9MFY24, the company added 65-70 corporate accounts with a combined billing potential of INR 6 bn in terms of gross bookings. Other expenses were higher as the company incurred legal and professional fees (not related to IPO) during the quarter. The company achieved a net cash position with a $\mathbf{5 1} \%$ reduction in gross debt sequentially, with a comfortable net $D / E$ position at $0.49 x$. The company increased its market share in Tier 2 and 3 cities on account of channel shift from offline to online. The company maintains its guidance of achieving PAT of INR $\mathbf{2 0 0} \mathbf{~ m n ~ i n ~ 1 Q F Y 2 5 . ~ W e ~ r e v i s e ~}$ our earnings by $-45 \% /-16 \% / 0 \%$ over FY24E-26E to factor in the one-off legal and professional fee, and elevated marketing expense which is likely to continue for the next few quarters. Maintain BUY with an unchanged target price of INR 198, valuing the stock at a PE multiple of 24x on FY26E EPS.
3QFY24 in a nutshell
Although corporate business was muted due to seasonality, gross booking in 3QFY24 grew by $18 \%$ YoY to INR 18.6 bn ( $6.3 \%$ QoQ) broadly in line with our estimate of INR 18.7 bn. Revenue was also in line at INR $1.1 \mathrm{bn}(23 \% \mathrm{YoY} / 17 \%$ QoQ), driven by market share gain in the air ticketing segment. EBITDA stood at INR 36 mn vs. INR 25 mn YoY (EBITDA loss of INR 85 mn in the last quarter). Margin grew by 51 bps YoY to $3.3 \%$. Adj PAT stood at INR 11 mn vs. a loss of INR 56 mn YoY. During the quarter, YATRA added 26 new corporate accounts with a total annual billing potential of INR 2.2 bn. In 9MFY24, the company added 65-70 corporate accounts with a billing potential of INR 6 bn in terms of gross booking. The company turned net cash with a $51 \%$ reduction in gross debt sequentially. Net D/E is in a comfortable position at 0.49 x .
Continues to gain market share
YATRA's domestic air passenger grew by $26 \%$ YoY to 1.7 mn , outpacing the industry growth of $9 \%$ YoY. The company gained market share in Tier 2 and 3 cities which witnessed strong growth in both domestic as well as international travel. Earlier most of the travel bookings in Tier 2 and 3 cities were done through traditional travel agents which has now shifted to online due to ease of booking. This channel shiff from offline to online has helped the company to gain market share.
B2B market to grow $2 x$ the overall travel market
As per RBI, GDP is likely to grow by $7 \%$ in FY24, implying higher business activity and related travel. Historically, travel follows GDP growth and grows at $1.5-2 x$ of GDP. With the government pushing travel and tourism, along with strong traction in corporate travel, we expect Yatra to benefit from these tailwinds.

## Investment Summary

Given the ongoing tailwinds in the travel industry, we believe the upward trajectory in both corporate and leisure travel is likely to continue. Strong traction in corporate travel is expected to be seen in 4QFY24 which is seasonally a strong quarter. Owing to one-off legal and professional fee and elevated marketing expense which is likely to continue for next few quarters, we revise our earnings by -45\%/-16\%/0\% over FY24E-26E. Maintain BUY with an unchanged target price of INR 198, valuing at a PE multiple of 24x on FY26E EPS.

## Quarterly Snapshot - 3QFY24

Exhibit 4: EBITDA was impacted by one-off legal and professional fee

[^17]
## Conference Call Highlights

## - Macro:

- Travel follows GDP growth, travel grows 1.5-2x of GDP growth.
- Religious travel is $12-13 \mathrm{mn}$ of passenger volume. Government focus is on travel \& tourism and is expected to grow at $8 \%$ CAGR. Significant headroom for growth.
- Gross bookings grew $18 \%$ YoY to INR 18.6 bn. Air segment grew by $22 \%$ and hotels grew by 3\% YoY.
- Air segment grew by $26 \%$ YoY in terms of volume, outpacing the industry growth of $9 \%$. Gained market share due to channel shiff from offline to online in Tier 2 and 3 cities. High growth witnessed in both domestic and international travel.
- B2B segment - Added 26 new corporates with total annual billing potential of INR 2,237 mn. 60\% to be implemented this year and 100\% from FY25. In 9MFY24 added 65-70 corporate accounts with a billing potential of INR 6 bn in terms of gross booking.
- Corporate business continued to be impacted by muted business travel spends across IT/ ITES clients.
- Hotels: Strong domestic growth. Intensity is stable. Overall growth was muted as corporate travel is weak during the festive season.
- Marketing expenses increased 8\% YoY. Likely to remain range bound INR 100-120 mn a quarter and entirely for B2C.
- Gross debt reduced by $51 \%$ on QoQ basis. Further reduction is expected in 4QFY24. Finance cost likely to be INR 60 mn annually at 9\%-10\% borrowing cost.
- Other expenses are higher due legal and professional fees which was incurred in this quarter (not related to IPO). Expect some rationalization in the next few quarters.
- Strong corporate momentum, confident of achieving PAT of INR 200 mn in 1QFY25. Strong traction from corporates. Capacity might be impacted due to engine issues, however, the company does not expect much impact.
- Service cost increased on account of higher package sold; this is seasonal. Would come down in 4QFY24 but go up again in 1QFY25.
- Cautious on take rate expansion in air segment due to supply constraints. Hotel margin to improve over the next two quarters.
- Share based expense/ ESOP was INR 52 mn . No dilution for Indian entity; no cash outflow. Expect to be at similar level going forward.
- Margins: B2B 20\%, B2C mid-high single digits. TRUST

## Price performance vs Nifty

3QFY24 RESULT REVIEW

## Solara Active Pharma Sciences

## Weak results; another strategy reset

Solara Active Pharma (SOLARA) reported a revenue decline of $\sim 37 \%$ on a YoY basis, mainly on account of the fire incident at the Puducherry facility and also due to order deferment. The company estimates a revenue loss of ~INR $\mathbf{1 , 3 0 0} \mathbf{~ m n}$ due to production disruption in relation to the fire incident and INR 550 mn for deferment of shipments. During the quarter, SOLARA announced another strategy reset in two years, wherein the company will be focusing on selling more products in regulated markets with a sharp focus on cost management. As a part of the reset strategy, SOLARA has discontinued several tail-end products, for which commensurate provisions have been made. As per SOLARA's own estimates, these measures are likely to drive gross margin improvement resulting in an EBITDA margin of $\mathbf{\sim} \mathbf{2 0 \%}$ in FY26 on a steady state.
However, we believe the strategic reset is likely to improve SOLARA's EBITDA margin to the $\sim 14 \%-15 \%$ range only, as the company's products are highly competitive and commoditized. Although in a best-case scenario, we assume the gross margin is likely to move towards $\mathbf{\sim} 50 \%$ and could come with its own set of challenges, to neutralize these challenges the company is looking for third-party vendors for process optimization.
Gross margin for the quarter came in at $13.4 \%$ on account of one-time inventory write-off and lower revenue to regulated markets. With an increase in other expenses relating to customer claims and negative operating leverage, SOLARA reported a negative EBITDA margin of $65 \%$ for the quarter. With the impending improvement in the demand scenario for its key products, management remains confident of higher revenue from regulated markets for Ibuprofen and better unitization of its facilities.
We expect improved utilization at Solara's Vizag facility towards regulated market sales, which is likely to result in a higher gross margin. However, we also see higher pressure on API prices to sustain which is likely to offset volume growth. We keep our revenue estimates largely unchanged and reduce our EPS estimate by ~4\% for FY26. We maintain SELL rating on the stock with a revised target price of INR 300 (earlier INR 333), valuing the company at 15x P/E on FY26 EPS.
Focus on regulated markets to improve gross margin
During the quarter, SOLARA reported several one-offs on account of the fire incident at its API unit and also due to a reset in strategy which resulted in the discontinuation of low-margin products, inventory write-offs, and order delays. In our view, the renewed focus on regulated markets is a step in the right direction which is likely to improve its gross margin. We expect gross margin to improve materially in FY25 to $\sim 49 \%$ led by process optimization, reduction in RM costs, and stable demand in its key products.

## Our View

We believe SOLARA's focus on regulated markets is a step in the right direction and the company expects to achieve $\sim 20 \%$ EBITDA margin in FY26. We also believe the strategic reset is likely to improve its EBITDA margin to the $\sim 15 \%-16 \%$ range as the company products are highly competitive and commoditized. We find it hard to arrive at ~20\% EBITDA despite assuming a high gross margin and revenue growth of $13 \%$ CAGR. With a better product mix, reduction in RM cost and a higher share of regulated market sales, we expect gross margin to improve and peak of $\sim 50 \%$ and the resultant EBITDA margin to peak at $\sim 14 \%-15 \%$ for FY26; we maintain SELL rating on the stock.

## Conference Call Takeaways

## Operational highlights

- SOLARA in 3QFY24 reported sales of INR 2.5 bn, declining ~37\% YoY and $42 \%$ QoQ on account of a fire incident at the Puducherry site.
- The quarter saw ~INR 1.85 bn impact on revenue due to the fire incident which includes INR 1.3 bn loss of revenue and INR 550 mn deferment to 4 QFY24.
- Regulated market revenue was at 61\% of 3QFY24 revenue (vs. 68\% in 3QFY23 and $71 \%$ in 2QFY24).
- Gross margin contracted to $13.4 \%$ due to the fire incident (INR 640 mn ), deferment of revenue (INR 360 mn ), and resetting operations (INR 1 bn ). Change in geographic mix with lower regulated market sales impacted gross margin for the quarter.
- Staff costs declined $2 \%$ QoQ.
- Other expenses for $3 Q$ were INR 1.3 bn , the expenses included INR 430 mn one-time claims from customers.
- EBITDA came in at INR 1.6 bn.
- The company also made a provision of INR 628 mn towards the fire incident.
- APAT came in at INR 2.2 bn.
- Term loan reduced by INR 893 mn during 9MFY24 from INR 3,524 mn to INR 2,680 mn.
- Gross debt has reduced by INR 748 mn during 9MFY24 to INR 9,264 mn.

## Guidance

- Key focus area:
- Aggressive focus on products with high profitability.
- Categorization of products based on profitability per KL.
- Discontinuance of products that do not deliver minimum profitability thresholds and where we do not control cash flows.
- Focus on cost control and cost Improvement programs through alternate vendors to achieve improved COGS.
- The company guided for revenue reverting to INR 4,000 mn per quarter with improved gross margin and EBITDA in the range of $20 \%-22 \%$ by the end of FY25.
- Focus on bringing down net debt to EBITDA to less than $\sim 3 x$ by 4QFY25.

## Rights issue

- Further to the announcement made by the company on July 5, 2023 regarding fund raising through a rights issue, the company has appointed a merchant banker for the proposed issue.
- The company is in the process of filing the offer document with stock exchanges.
- The company has taken permission for up to INR 4.5 bn, but may require only up to INR 3.5 bn.
- Promoters are committed to subscribing to the issue to the extent of their holdings and are also willing to subscribe and underwrite the unsubscribed portion of the public holdings.
- The proceeds of the right issues will be mainly used towards repayment of debt.

## Other commentary

- Puducherry resumed supplies to regulated markets in Jan'24 post corrective actions and permissions to commence production.
- Solara is adequately insured to cover against loss of profits. The insurance claim has been made and no deferred income on account of the insurance claim is considered in our results.
- Reset strategy:
- As part of the strategy, several long tail products have been discontinued resulting in the provisioning of discontinued products to the extent of INR 203 mn and loss on liquidation of discontinued products to the extent of INR 134 mn .
- One-off impact of reduction in inventory levels to the extent of INR 175 mn .
- INR 492mn provided for long outstanding receivables related to post Covid-19 sales
- The CFO, Mr. P. V. Raghavendra Rao has resigned.
- The company has also decided to consolidate operations, thereby shutting Chennai office.
- Mr. Arun Kumar has joined back the business to mentor and guide the management with the turnaround of the business.
- The company will revive its dormant DMFs.
- Gross margin to begin improving from 1QFY25 and will continue to improve in FY25.
- The company is closely working to reduce the working capital days to the optimum level.

■ Confident of generating INR 1.5 bn FCF in FY25.

## Risk to our assumptions

i) Inorganic growth-We assume that the company has capability to pull off another merger in either API or CRAMS space and remains a key risk to our assumptions.
ii) Faster ramp-up in high value products like Dabigatran-We believe Strides has filed for an ANDA on Dabigatran and is awaiting approval in FY23. If the company is able to get the approval on time or before, we will revise our estimates for this product.
ili) Higher CRAMS growth compared to our estimates-We have estimated a revenue CAGR in the CRAMS business. More commercial launches and larger client additions contributing meaningfully would be at risk to our assumptions.

## Important Disclaimer:

This report has been prepared by Antique Stock Broking Limited (hereinafter referred to as ASBL) to provide information about the company(ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies).
ASBL is a Stock Broker having SEBI Registration No. INZOOOOO1 131 and Depository Participant having SEBI Registration No. IN-DP-721-2022(CDSL) registered with and regulated by Securities \& Exchange Board of India. SEBI Registration Number: INH000001089 as per SEBI (Research Analysts) Regulations, 2014. CIN: U67120MH1994PLC079444
ASBL and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group.
This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and ASBL is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that ASBL and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on the profitability of ASBL which may include earnings from investment banking and other business.
ASBL generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover Additionally, ASBL generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing among other things, may give rise to real or potential conflicts of interest. ASBL and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of ASBL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report
Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and as such, may not match with a report on a company's fundamental analysis. In addition ASBL has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.
Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt ASBL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold ASBL or any of its affiliates or employees responsible for any such misuse and further agrees to hold ASBL or any of its affiliates or employees tree and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent ASBL's interpretation of the data, information and/ or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information herein on reasonable basis, ASBL and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent ASBL and/or its affiliates from doing so. ASBL or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. ASBL or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.
