Continued growth momentum

## Global News

- The major averages ended the day narrowly mixed. While the Nasdaq edged down 16.69 points or 0.1 percent to $16,332.56$, the Dow crept up 31.99 points or 0.1 percent to $38,884.26$ and the S\&P 500 inched up 6.96 points or 0.1 percent to $5,187.70$.
- The Nikkei 225 Index jumped $1.57 \%$ to close at 38,835 while the broader Topix Index gained $0.65 \%$ to 2,746 on Tuesday, with Japanese shares hitting three-week highs as investors returned from a holiday-extended weekend. Domestic stocks also tracked gains on Wall Street as soft US jobs data revived hopes that the Federal Reserve will start cutting interest rates soon. In Japan, a final reading showed that private sector activity remained expansionary in April as services activity expanded the most in eight months.

## Sector \& Corporate News

- Tata Motors tops Indian auto market with Punch Mini SUV, beats

Maruti: Tata's Punch achieved a significant milestone by outselling Maruti's long-reigning WagonR, with 17,547 units compared to 16,368 sold by the latter.

- Japan's Sumitomo Mitsui Financial invests INR 1,300 cr in SMFG India Credit: Japan's Sumitomo Mitsui Financial Group (SMFG) said on Tuesday it has invested INR 1,300 crore in non-bank lender SMFG India Credit Co Ltd (SMICC) through a rights issue to drive growth.
- Fuel consumption increase by $\mathbf{6 . 1 \%}$ YoY in April: Oil ministry: Total consumption in April increased to 19.86 million metric tons or 4.85 million barrels per day from 18.71 million tons last year. However, the demand in April declined by 5.8\% from March this year.

4QFY24 RESULT REVIEW

## Godrej Consumer Products

## Recovery in HI, GAUM profitability to drive re-rating

Godrej Consumer Products' (GCPL) 4QFY24 performance was ahead of our expectations led by the performance in India and Indonesia. Domestic organic revenue/ volume grew $5 \% / 7 \%$, which was broad based. The launch of liquid vaporizer with a new molecule (with higher efficacy) will help GCPL achieve high single digit to early double-digit volume growth in India over the medium term. Indonesia business performance improved significantly in FY24 on the back of corrective action taken by the management, which should continue. Additionally, GAUM profitability should improve with the restructuring of the Africa business. We remain confident of GCPL's performance driven by a) High single-digit volume growth in India and Indonesia with maintenance of healthy EBITDA margin (+20\%), b) Improving profitability in GAUM. Consequently, we increase our target multiple to 50x vs. 45x. We cut our FY25 EPS estimate by 7\% adjusting for a higher tax rate while increase it by $5 \%$ for FY26. We maintain BUY recommendation with a revised TP of INR 1,522 (previously INR 1,300), based on FY26E EPS.
4QFY24 performance was driven by strong performance in Indonesia and India business
India sales grew 12\% YoY with $15 \%$ growth in volume while organic revenue grew $5 \%$ with volume growth of 7\%. In India, the home care business grew by 6\% driven by air fresheners and fabric care, while the personal care business grew by $4 \%$ due to strong volume growth during the quarter. Household insecticide (HI) witnessed a subdued quarter due to the extended winter in the North and parts of East. The non-mosquito portfolio continues to perform well and the company's new incense stick launch continues to gain market share from unorganized players. Air freshener volume continues to grow in double digits. Park Avenue and KamaSurra continued their healthy run rate to deliver INR 1.37 bn of sales. Indonesia's business performance improved with sales growth of $17 \%$ in CC terms led by double-digit growth in HI and hair color. GAUM delivered 16\% growth in CC terms while in INR terms sales declined $23 \%$ impacted by the devaluation of NAIRA.
Strong profitability improvement; A\&P spends increased by $36 \%$ in India business
The consolidated gross margin expanded by 322 bps YoY to $56.1 \%$. Consolidated EBITDA grew $14 \%$ YoY and the margin expanded by 168 bps YoY to $22.5 \%$. A\&P spend increased by $36 \% \mathrm{YoY}$ to $9.1 \%$ of sales vs. $7.1 \%$ last year. India EBITDA margin remained healthy at $26.7 \%$. In international business, Indonesia EBITDA margin improved by 360 bps YoY to $25.2 \%$ while GAUM EBITDA margin expanded 390 bps YoY to $14.3 \%$.
India and Indonesia to deliver strong performance; GAUM profitability to improve
In our view, the company would be able to achieve high single-digit volume growth in India and Indonesia while maintaining healthy EBITDA margin and improving profitability in the rest of the world by restructuring the business in East Africa. The strategy implemented in 2022-23 to drive growth over the medium to long term a) Led through category development (innovation, accessible packs, increase efficacy) and b) Funded for simplification (reducing SKUs, Simplifying processes) is yielding results. In our view, the launch of LV with new molecule (RNF formulation) will help market share gain over the medium to long term. Additionally, the company implemented Project Vistaar 2.0 to expand village distribution reach by $3 x$ in the next two years.

## Investment Summary

Post 4QFY24, we cut our FY25 EPS estimate by 7\% adjusting for a higher tax rate while we increase our FY26 EPS estimate by 5\% driven by strong recovery in HI in India (product innovation) and improving profitability in GAUM business (post restructuring). We expect GCPL to deliver sales/ earnings CAGR of $14 \% / 24 \%$ over FY24-26E. The improving performance across geographies should further help in GCPL's re-rating. We maintain BUY recommendation with a revised TP of INR 1,522 (previously INR 1,300) based on 50x PER (previously 45 x ) on FY26E EPS.

## Analyst Meet Takeaways

## Overall business

- During FY24, GCPL achieved organic volume growth of 7\% with high-teens EBITDA growth. RCCL revenue integration is complete and the revenue and EBITDA for FY24 was similar to FY23.
- For FY25, the company expects high single-digit volume growth in India and Indonesia, and to improve profitability in the rest of the world.
- The strategy to drive growth over the medium to long term has a) Led through category development and b) Funded for simplification.
- The company is focusing on category development by a) Becoming more relevant to consumers (purpose-based consumption, e.g. AER during guests at home), b) Increasing access packs (smaller SKUs), c) Increasing availability of products (distribution expansion), and d) Increasing consumption through trails.
- GCPL is further focusing on simplification of business by a) Fewer SKUs ( $30 \%$ reduction over the last two years), b) Fewer people (reduced managers by 10\%), c) Fewer operations (reducing manufacturing footprint by $40 \%$ over FY24-26), and d) Simpler business processes by building an in-house creative and design team, single advertisement (led to 40 bps of saving from single in-house media agency).
- The company is implementing project VISTAAR 2.0 (van operation) to expand its current direct reach to 400 k outlets in the rural market by another 300 k in $2-3$ years. This would be implemented by $700+$ vans in 100 k villages.
- FY24 was better than FY23 in terms of innovation. Innovation has provided an incremental revenue growth of $1.5 \%$ and the company aims for $3 \%$ over the medium to long term.
- In HI, GCPL has lost MS due to incense sticks, but with the launch of agarbatti the company would gain MS.
- The company has reduced its core working capital days from 50 to 38 over FY22-24.
- ETR for FY25 would be $30 \%$ and FY26 would be $\sim 25 \%$. Actual cash ETR would be lower.
- Going ahead, the company would have dividend payout ratio of $50 \%$.
- Capex of INR 9 bn in organic manufacturing over next 18-24 months. Normalized capex post that where capex will be equal to the depreciation charge.

## India

- For FY25 in India, the company is implementing a three-pronged strategy of a) Premiumization by innovation, b) Improving efficiency by consolidating its manufacturing footprint, and c) Increase affordability with access packs.
- Going ahead for the RCCL business, the company expects high double-digit volume growth and to be EPS neutral by the end of FY25. The company highlighted that the deodorant category still has some work to be done.

## Indonesia

- The category in which GCPL is present has maximum penetration of $20 \%$, which gives immense headroom for growth.
- GCPL has been able to improve Indonesia business performance after taking corrective action on pricing, revamping go to market (GTM), and increasing brand investments.
- FY24 performance was driven by HI (38\% growth) and hair color (esp. shampoo hair color). Air care declined 3\% in FY24, which need more work.
- In Indonesia, HI has high saliency from Aerosol compared to LV. Launch of access pack of 150 ml led the growth during FY24, which was further supported by improving efficacy, increase in media spending, and trial packs to 1 mn households. LV grew $+80 \%$ and aerosol grew 23\% in FY24.
- Going ahead, the Indonesia business should sustain high single-digit volume growth and EBITDA margin of mid 20s by a) Sustaining performance in HI; b) Reviving growth in air care by innovation, offering accessible packs, and higher media spends; and c) Scaling up the hair color category.

## Rest of the world (GAUM \& LatAm)

- Performance has been muted due to the difficult macroeconomic situation and higher overheads, currency headwinds.
- Going ahead, the company would be focusing on volume growth, INR profit, and cash flow growth.
- To manage volatility, the company would take appropriate pricing actions and reduce factories and SKUs to cut cost.
- Profitability is improving with FMCG saliency going up from $40 \%$ in FY 22 to $>50 \%$ in FY24.
- In Southern Africa, the company has increased direct distribution reach by 1.4x. Southern Africa and the export business has strong performance with double-digit growth and ~20\% EBITDA margin.
- The company has restructured the business in East Africa which will help in positive cash flow and 150 bps of margin improvement.
- The aim is to drive volume growth to mid-single digit over the medium term and improve profitability to $>15 \%$ EBITDA margin vs. the current $8 \%-10 \%$.

## 4QFY24 RESULT REVIEW

## Dr. Reddy's Laboratories

## Base business sees volume decline

Dr. Reddy's Laboratories (DRRD) reported a YoY revenue growth of 12\%, largely driven by higher revenue from North America (NA) generics which came in at USD 391 mn. The NA generics portfolio showcased muted growth on a sequential basis, largely due to a decline in base business volumes, higher price erosion, and increased contribution from gRevlimid (our est. ~USD 145-150 mn). DRRD's India business revenue declined ~12\% YoY, however, adjusting for brand sales in the base quarter, adjusted growth stands at $\mathbf{\sim}$ 12\% YoY. We believe DRRD continues to face increased competitive intensity in its key base business products, and given the lack of niche limited competition products, its core EBITDA margin (ex-gRevlimid) is likely to remain capped at $22 \%-23 \%$. We keep our revenue estimates largely unchanged and lower our FY26 EPS estimate by ~4\%. Given DRRD's traction in forging JVs and partnership for the India business, we increase our target multiple by $\sim 5 \%$ and value the core EPS at 20x FY26. We maintain SELL rating on the stock with a revised TP of INR 5,095 (earlier INR 5,079), including NPV of ~INR 172 from gRevlimid.

North America generics-Incremental competition in key products from FY25
The North America generics porffolio declined by 3\% sequentially, largely on account of a decline in base business volumes, higher price erosion, and increased contribution from gRevlimid. During the quarter DRRD's launched 5 new products in North America, of which 4 were launched in the U.S. A total of 21 products were launched during the year. DRRD is expected to witness incremental competition in its key base business products, with Amneal launching gCiprodex. As per our estimates, DRRD's volume market share in its key base business products viz. gVascepa and gCiprodex has not grown meaningfully in recent quarters and the company also faces stiff competition in its new launches viz. glexiscan and gRemodulin. DRRD's remains a filer of highly competitive products viz. gSprycel, gEntresto, gForteo, gVenclexta, and gDexilant. With lack of niche limited competitive launches, we expect its core North America revenue to grow at $\sim 1 \%$ CAGR in CC terms over a two-year period (excluding gRevlimid).
On the biosimilar front, DRRD launched bPegfilgrastim in partnership with Fresunius Kabi, making it eligible for royalty on revenue. DRRD's bRituximab was issued CRL which puts the filing under review and we expect a delay in product approval and subsequent launch; we expect the launch post FY26. We estimate the biosimilar portfolio to generate ~USD 20 mn revenue in FY26 and become a more meaningful contributor from 2HFY27.

## Our View

We believe the base business in North America generics continues to face higher price erosion coupled with lower volumes and incremental competition which is likely to impact gross margin. Going forward, we expect DRRD to sustain and grow its market share in gRevlimid and expect the base business to remain in the ~USD 250-270 mn range for FY25. With marginal benefits from (i) Shortages in the US market and (ii) Continued elevated price erosion, DRRD's core EBITDA margin (ex-gRevlimid) is likely to peak in the range of $22 \%$ $23 \%$. With the lack of limited competition launches we expect US generics to largely remain flat for the next two years. We believe the current stock price has largely priced in its current and forthcoming opportunities in the US. We maintain SELL rating on the stock.

Table 1: DRRD's prospective launch pipeline-most products likely to face high competition

## Conference Call Highlights

- DRRD in 4QFY24 reported sales of INR 70.8 bn growing $12 \%$ YoY aided by the North American market. Adjusted for income from non-core brands divested in the previous year, YoY growth was $17 \%$.
- Gross margin expanded 140 bps YoY to $58.6 \%$. The improvement can be attributed to improvement in product mix and productivity cost savings.
- During the quarter, the company received INR 810 mn in government grants.
- SG\&A spend increased $14 \%$ YoY to INR 20.5 bn. The rise in SG\&A costs was largely on account of higher investments in sales \& marketing activities to strengthen existing brands, new business initiatives including scaling up OTC and consumer health \& wellness business, digitalization initiatives, and building strong commercial capabilities.
- R\&D spend for the quarter was INR 6.9 bn, accounting for $9.7 \%$ of sales. The R\&D spend is related to DRRD's biosimilar products pipeline, development efforts across generics, and novel oncology assets.
- Margin was flat YoY at 25.2\%
- ETR was at 18.4\% lower due to a one-time benefit accruing on account reversal of a tax provision, re-measurement of deferred tax asset owing to increase in USA state tax liability and adoption of corporate tax rate.
- PAT for the quarter was INR 12.9 bn, growing $29 \%$ YoY.
- Capex for the quarter was INR 5 bn.
- The company reversed impairment of INR 226 mn with respect to saxagliptin/ mefformin (gKombiglyze XR) and enalaprilat (gVasotec) pursuant to the launch of these two products during the year.
- The board recommended a dividend of INR 40 per share.
- Debt increased to INR 20 bn with net debt stood at INR 66.7 bn.
- Working capital days increased to 148 as of Mar'24 vs. 141 days as of Mar'23.

## Global generics

1) Global generics reported sales of INR 61.2 bn, growing $13 \%$ YoY, primarily driven by an increase in volumes of the company's business, new product launches, partially offset by price erosion in certain markets.
2) Gross margin for the segment was $62 \%$.
3) DRRD acquired MenoLabs® business, a women's health and dietary supplements branded portfolio from Amyris, Inc.
4) North America:
a) North America sales for the quarter increased $29 \%$ YoY to INR 32.6 mn , accounting for $46 \%$ of sales. The growth was largely on account of increase in volumes of its base business, contribution from new launches, partly offset by price erosion.
b) During the quarter, DRRD launched five new products in the region, of which four were launched in the USA; a total of 21 products were launched during the year.
c) DRRD filed nine ANDAs, taking the annual ANDA filing count to 17. As of Mar'24, 86 generic filings were pending approval from the USFDA, comprising of 81 ANDAs and five NDAs filed under the Section 505(b)(2) route. Of the 86 ANDAs, 50 are Paragraph IV applications, and 24 of these are believed to be FTF opportunities.
d) Voluntary Action Indicated (VAI) was received from the USFDA for formulations manufacturing facility (FTO-3) in Oct'23 and R\&D facility center in Bachupally in Dec'23.
e) DRRRD received a CRL from the USFDA on BLA of bRituximab. The company continues to work closely with the agency to address and resolve all concerns within stipulated timelines.
f) The company aims to launch 20+ products in FY25.
5) Europe
a) Sales from the Europe market for the quarter grew $5 \%$ YoY to INR 5.2 bn, accounting for $7 \%$ of sales.
b) The growth was primarily on account of improvement in base business volumes, new product launches, partly offset by price erosion.
c) Germany reported sales of INR 2.8 bn , growing 7\% YoY.
d) The UK reported a sales of INR 1.5 bn, growing $9 \%$ YoY.
e) Rest of Europe reported sales of INR 2.8 bn , declining 7\% YoY.
f) The quarter saw six new products in the European region.
g) The company forayed into the consumer health market in the UK with the launch of an allergy medication, Histallay.
h) Bevacizumab was launched in the UK.
i) Nerivio was launched in Europe.
i) bRituximab planned for launch in the UK.
6) India
a) Domestic sales declined $12 \%$ YoY to INR 11.3 bn, accounting for $16 \%$ of quarterly sales.
b) Adjusted for brand divestment income the YoY growth was $11 \%$.
c) DRRD launched three new brands during the quarter and 13 in FY24.
d) The company entered into an exclusive partnership with Sanofi to promote and distribute its vaccine brands in India. The deal makes DRRD the $2^{\text {nd }}$ largest vaccine player in IPM.
e) DRRD partnered with Bayer to distribute a second brand for heart failure management drug, Vericiguat, in India.
f) The company entered into a licensing agreement with the US-based biopharma, Pharmazz, to market first-in-class Centhaquine (Lyfaquin ${ }^{\circledR}$ ) for treatment of hypovolemic shock in India.
g) $+50 \%$ of the product is manufactured in-house and the company plans to increase it further.
h) BGx will grow at double-digit going ahead.
i) Aims to grow the domestic business at $10 \%$ for FY25; ex-Nestle JV deal.
i) DRRD aims to be in the top 5 in IPM.
7) Emerging markets
a) Sales from emerging markets grew $9 \%$ YoY to INR 12.1 bn during 4QFY24, this growth can be attributed to new product launches. The quarter saw 17 new launches and 106 launches in FY24.
b) Revenue from Russia declined $4 \%$ YoY to INR 5 bn due to unfavorable currency exchange rate movements, partially offset by price increases.
c) Revenue from other CIS markets declined 5\% YoY to INR 2.2 bn due to a decline in base business volumes, partly offset by increase in prices.
d) Revenue from ROW markets grew $34 \%$ YoY to INR 4.9 bn aided by new launches.
e) Nerivio $\circledR$ was launched in South Africa.
f) The company is satisfied with the progress it is making in the China market and has some good approvals. The plan is to continue to submit 14-15 products annually. The key risk to the business remains the forex fluctuation.
g) Management expects the RoW market to grow in double digits for FY25.

PSAI and other

- The PSAI segment grew at $6 \%$ YoY to INR 8.2 bn, driven by revenue from new products, favorable forex, partially offset by price decline.
- Gross margin for the PSAl segment was $\sim 29 \%$.
- DRRD filed 48 DMFs globally in 4Q, taking the annual count to 133.
- Proprietary Products \& Others grew 54\% YoY to INR 1.4 bn.

## Guidance and other commentary

- R\&D spend to be in $\sim 8.5 \%-9 \%$ range for FY 25 , of which $\sim 60 \%$ will be spent towards small molecules, $\sim 20 \%$ towards biosimilars, and the rest on API.
- SG\&A at $\sim 29 \%$ of sales due to spend on marketing and brand building.
- Management guided for the margin to remain in $\sim 25 \%$ range.
- ETR to be in $24 \%-25 \%$ range.
- Aiming for $25 \%$ RoCE.
- The company aims to launch is first large revenue biosimilar in FY27. The company will continue to focus on opportunities where it can be among the first to launch.
- Capex spends are majorly aimed towards expansion ( $2 / 3^{\text {rd }}$ ).
- $50 \%$ of the capex is expected to be spent on injectables and APIs and rest towards biologics and small molecules.

## Risk to our assumptions

1) Litigation risks in gRevlimid-An FTC involvement and resulting penalties could materially change our gRevlimid assumptions.
2) Regulatory risk - Any critical site coming under USFDA's adverse verdict could result in delay in new product approvals.
3) Price erosion—Material shift in price erosion in U.S. base portfolio, with earlier than anticipated competition.

## 4QFY24 RESULT REVIEW

## Lupin

## Margin improvement continues

Lupin (LPC) reported a revenue growth of $\mathbf{1 2 \%}$ on YoY basis driven by US Generics and other exports markets viz. EMEA \& growth markets. India formulations revenue grew by $8 \%$ YoY driven by growth in its core therapies of CVS, Respiratory, and Oncology. The Anti-diabetic portfolio reported muted growth on account of loss of exclusivity and the subsequent price erosion, however, its non in-licensing portfolio grew by $\mathbf{\sim}$ 12\% YoY. On the export front, the US generics segment reported a muted revenue of USD 209 mn, flat sequentially. We remain optimistic on LPC's US generic opportunities with limited competition launches viz. gMyrbetriq, gTolvaptan, gSprycel, and gTrijardy XR. As per our estimates, these launches and market share growth in gSpiriva are likely to drive LPC's US generic revenue to ~USD 1 bn by FY26. We keep our revenue estimates unchanged and increase FY26 EPS by ~4\% on account of lower interest expenses and higher gross margin. We maintain BUY rating on the stock with a revised TP of INR 1,800 (earlier INR 1,732) valuing the company on a P/E multiple of $25 \times$ on FY26 EPS.
US generics to grow at $\sim 10 \%$ CAGR over 2 years
The segment reported a revenue of USD 209 mn , flat on a sequential basis, key product launches viz. gProlenza and gDiazepam gel were offset by incremental competition in gPrezista, seasonal product sales impact, and price erosion in the base business. The market share of its key respiratory products viz. gAlbuterol and gSpiriva, remained intact.
LPC's US growth hinges on gaining market share in gSpiriva where the company has not reduced its prices significantly and sells the product at $\sim 13 \%$ discount to the innovator's price (refer exhibit 1). We believe this is an encouraging start given the difficulty in gaining market share in the complex respiratory products and having to deal with the innovator's efforts at luring away patients to Spiriva Respimat. For gSpiriva, we estimate LPC to garner a revenue of $\sim$ USD 160 mn in FY25 and ~USD 180 mn in FY26 assuming ~35\% market share and contributing over $\sim 20 \%$ to its profitability.
We remain upbeat on LPC's US generics launch pipeline, as the company has large-value products viz. gMyrbetriq, gEntresto, gTolvaptan, and gXyrem in which it is competitively positioned. Besides these, the company has lined up other key launches: gRevlimid, gSprycel, and Trijardy XR. LPC has a clear focus on developing its complex product pipeline in the Respiratory segment, with a bulk of the filings lined up on the DPI \& MDI front. Amongst the Indian generic companies, we believe LPC has the best-in-class respiratory launches and filings in the US. The company is expected to file for highly complex products under the Ellipta franchise i.e. Breo, Trelegy Ellipta, and Spiriva Respimat in FY25. We expect Lupin's US generics revenue to grow to ~USD 1 bn by FY26, implying ~10\% CAGR over FY24-26E.

## Investment Summary

LPC reported improved gross margin for quarter largely driven by improvement in India business growth. Going forward, we believe LPC's India business is likely to grow at $\sim 11 \%$ CAGR over the coming 2-3 years which could further improve its gross margins. Besides, LPC has one of the best launch pipelines amongst large-cap Indian generics which is likely to support its overall margin profile. Strong revenue growth along with higher utilization of various units are likely to drive our EBITDA margin assumption of $\sim 23 \%$ for FY26. We expect LPC's revenue to grow at $\sim 8 \%$ CAGR and EPS to grow at $\sim 30 \%$ CAGR over a two-year period. With the revival of growth in the India business and sustainable growth in its US generics portfolio, we continue to maintain BUY rating on the stock.

Table 1: Niche US generic pipeline

## Operational highlights

- LPC in 4QFY24 reported sales of INR 49.6 bn, growing $12 \%$ YoY aided by US formulation sales.

■ Gross margin for the quarter expanded 780 bps YoY to $68.3 \%$ aided by favorable business and product mix.

- Staff costs increased $1 \%$ QoQ.
- Other expenses (ex-R\&D) increased $4 \%$ YoY.
- R\&D spend increased to $8.6 \%$ of sales to INR 4.3 bn , over $50 \%$ of which was spend towards complex products. LPC received approval for 12 ANDAs from the USFDA in 4Q and now has 51 First-to-File (FTF) filings, including 18 exclusive FTF opportunities. Cumulative U.S. DMF filings stand at 157 as of Mar 31, 2024.
- Cost optimization led to margin expansion to $\sim 20.1 \%$.
- LPC took an impairment of INR 2 bn of intangible and tangible assets.
- APAT increase to INR 5.6 bn.
- The board recommended a dividend of INR 8 per share.
- Capital expenditure for the quarter was INR 1,059 mn.

■ Working capital days decreased to 123 in FY24 vs. 141 in FY23.

- Debt as of Mar' 24 stood at INR 29 bn vs. INR 45.4 bn as of Mar'23.
- Net debt decreased by INR 21 bn. Net debt-equity as on March 31, 2024 stood at 0.03 .

India

- Domestic revenue for the quarter increased $8 \%$ YoY to INR 16 bn, aided by Cardiac, Respiratory, and Gl therapies.
- Domestic sales accounted for $33 \%$ of sales.
- India Rx business grew $8.7 \%$ YoY ( $9.3 \%$ ex-Cidmus) in FY24 vs. IPM growth of $7.6 \%$
- Key segments, including Cardiology, Respiratory \& Oncology, are growing faster than the market. The company launched seven brands across therapies during the quarter and 28 throughout the year.
- The company's non-in-licensed Anti-diabetes portfolio reported a growth of $12 \%$.
- Revenue contribution of the in-licensed portfolio (\% of India Rx sales) decreased to $\sim 11 \%$ for 4QFY24 (~12\% FY24) vs. 15\% in FY23.
- As per IQVIA IMS MAT Mar'24, LPC reported $\sim 6 \%$ YoY growth with NI growth and price growth contributing $3.6 \%$ and $2.7 \%$ respectively, while volume growth came in at $-0.4 \%$.
- Domestic field force stood at $\sim 10,000$, including $\sim 7,500$ MRs.
- Diagnostic revenue was INR 600 mn , growing rapidly YoY, with increase in burn rate. The company expects the vertical to growth rapidly over the next five years with reducing burn rate.
- The company plans to grow the India business at an accelerated pace by:
- Increasing the share of chronic therapies
- Sales force expansion
- Expansion into new areas such as biosimilars
- Targeting M\&A activities that includes mid-size companies, brands \& portfolios
- Entering into in-licensing deals via partnerships
- Develop and launch in-house pipeline of novel assets. The aim is to launch 10 novel complex pipeline products in India by CY28.

## North America

- Revenue from North America grew at a robust $23 \%$ YoY to INR 19 bn, aided by new launches.
- North America sales accounted for $39 \%$ of sales.
- The CC revenue was USD 209 mn , declining 1\% QoQ due to seasonality, increase in competitive intensity partly offset by gain in market share in gSpiriva, gProlensa, and Albuterol.
- Price erosion remained stable QoQ.
- The company maintained market share of $\sim 23 \%$ and $28 \%$ in Albuterol and Arfomoterol respectively as per IQVIA.
- Contribution from the inhalation portfolio for the quarter stood at $\sim 40 \%$ of sales.
- The company filed one ANDA during the quarter and received 12 ANDA approvals from the USFDA.
- Six products were launched during the quarter. Some notable launches during the quarter were gBromfenac and gChantix.
- The company as of now has 161 generic products in the US market.
- Lupin continues to be the 3rd largest pharmaceutical player in both the US generic market and the entire US market by prescriptions (IQVIA Qtr TRx March 2024). Lupin is the leader in 47 of its marketed generics in the US and amongst the top 3 in 105 of its marketed products (IQVIA Qtr March 2024).
- The company has a strong pipeline in the US market consisting of $40+$ injectables and 20+ inhalation.
- The company received EIR for Nagpur unit-1, Mandideep unit-2 \& Aurangabad unit.
- Remediation work has been completed for Tarapur and Mandideep unit-1 which are currently under WL. The company aims to reach satisfactory compliance status within FY25.
- The company plans to focus on inhalation, injectables, ophthalmics, and biosimilars.
- The US business should sustain at USD 200 mn+ aided by 10+ launches in FY25 and MS gains in gSpiriva.
- gMyrbetriq, which was launched in 1QFY25 by LPC, received a temporary restraining order; the management remains confident of strong position in litigation and a favorable outcome. The product is to be relaunched post the litigation.
- gSpriva market share stable at $\sim 30 \%$; the company remains confident of $\sim 40 \% \mathrm{MS}$ in the near term due to lack of competition.
- FY24 saw single-digit price erosion. Given the ongoing shortages, the company expects erosion to be under control.
- The company is working on Ellipta products and is expected to share an update by the end of FY25.
- The company has already filed gLiraglutide, which is expected to launch upon approval.
- FY25 growth to be a single-digit growth year, aided by $20+$ launches ( $70 \%$ of which will be non-OSDs).
- FY26 is expected to be much better aided by Tolvaptan (exclusive generic), injectables (incl. gliraglutide), and other complex products.
- Management expects competition in gSuprep in FY25.
- Expect 5-6 products filings and launches from Nagpur unit-2 (injectable) unit.

## EMEA

- Revenue from EMEA grew at a robust $17 \%$ YoY to INR 5.3 bn driven by higher sales of NaMuscla and inhalation products like Luforbec.
- 4Q South Africa market sales were ZAR 438 mn , growing $5 \%$ YoY.
- German 4Q market sales were at EUR 10 mn , flat YoY.

Growth markets (LATAM and APAC)

- The growth market grew at $16 \%$ YoY to INR 5.1 bn, accounting for $10 \%$ of total revenue.
- Brazil market sales were BRL 51 mn, declined 32\% YoY.
- Mexico market sales were MXN 192 mn , growing $26 \%$ YoY.
- Philippines market sales were PHP 930 mn, growing 72\% YoY driven by Renal, Women's health, and tender sales.
- Australia market sales were AUD 29 mn , growing $21 \% \mathrm{YoY}$.

## Global API

- Global API sales for 4QFY24 was INR 2.6 bn, declined ~20\% YoY.

## Guidance

- The company aims to grow its topline at $\sim 10 \%$ for FY25.
- Gross margin sustaining at current levels.
- R\&D spends would be $5 \%$ of sales in FY25.
- Margin to be in the $\sim 20 \%$ range impacted by tailwinds; gMyrbetriq launch may aid further margin expansion.
- Aims to file three biosimilars in the regulated markets by CY28.
- Launched 20 complex product in the areas of inhalation, injectables, ophthalmics in the regulated markets.
- Aims to achieve $23 \%$ margin in mid-term.

## Risk to our assumptions

1) Delays in product approvals - Unexpected delays in key product approvals.
2) Execution risk - We have estimated a higher ramp-up in gSpiriva and other key products, any delays on this front can change our assumptions.
3) Regulatory risk - Although most of the plants with OAl status are now having EIR. Any further OAls could erode further value of some of the key generic products.
4) Price erosion in US - higher than budgeted price erosion poses downside risks to our estimates.
5) Increased genericization in India Rx business.

## 4QFY24 RESULT REVIEW

## Max Financial Services

## Market share gains likely to continue

Max Financial Services' (MAXF) FY24 APE grew 19\% YoY to INR 74.3 bn (~3\% above our estimate) implying five-year CAGR of $13 \%$. Growth was broadbased across products with ULIP/ par/ protection/ annuity each growing 50\%-65\% whereas non-par declined 24\%. Excluding one-off sales of INR 3.5 bn, total APE grew 26\% whereas non-par APE fell 13\%. FY24 VNB grew ~1\% YoY to INR 19.7 bn (five-year CAGR of 18\%) with VNB margin declining 465 bps YoY to $\mathbf{2 6 . 5 \%}$ owing to change in business mix and margins. The company remains focused on market share gains and expects APE growth to be in high teens over the next few years and VNB growth to be in line or marginally lower. We broadly maintain our estimates with an unchanged DCF-based TP of INR 1,280. Our target price implies FY26E P/EV of 2.4x and P/VNB of 17x after assuming 20\% holdco discount. Maintain BUY.
Focus remains on market share gains; broad-based growth across products
MAXF has been consistently increasing its market share. Its private market share rose from $8.6 \%$ in 1QFY24 to $10.4 \%$ in 4QFY24. FY24 total APE grew $19 \%$ YoY to INR 74.3 bn. NoP growth was robust at $20 \%$ YoY implying entire growth was through NoP. Savings APE grew $13 \%$ YoY, of which ULIP grew by $51 \%$ ( $92 \%$ in $4 Q$ ), par grew by $56 \%$, and non-par declined by $24 \%$. Protection APE grew by $50 \%$ YoY, of which retail protection increased by 63\%, whereas group protection grew by $34 \%$. Annuity APE grew $59 \%$ YoY (on a low base) to INR 4.7 bn. Excluding one-off sales of INR 3.5 bn, total APE grew $26 \%$ whereas non-par APE declined 13\% in FY24. In 4QFY24, total APE grew 13\% whereas non-par APE declined 16\% excluding one-off sales. Savings contributed $\sim 55 \%$ of APE growth led by ULIP, whereas protection and annuity contributed $\sim 45 \%$ of APE growth ( $\sim 30 \%$ by protection and $15 \%$ by annuity). The share of non-par decreased 1600 bps YoY to $28 \%$ whereas the share of ULIP/ par increased $800 \mathrm{bps} / 500 \mathrm{bps}$ YoY to $35 \% / 18 \%$ in FY24.
Proprietary channel leading growth, AXISB might lag
Proprietary channel/ other banks APE grew 28\%-29\% YoY to INR 29.6 bn/ INR 5.1 bn whereas AXISB's APE lagged with $10 \%$ YoY growth. The share of banca decreased by 400 bps to $58 \%$ while the share of proprietary increased 300 bps to $40 \%$. Proprietary channel/ AXISB contributed 55\%/ 30\% of APE growth. Agent recruitment growth was 54\% in FY24 which would drive higher growth going ahead. Counter share at Axis Bank was $70 \%$ and at Yes Bank it was $58 \%$. MAXF has tied up with 5-6 banks over the last one year, where the company is $3^{\text {rd }}-5$ th player and the counter share varies from $8 \%-9 \%$ to $60 \%$. MAXF's share is increasing across counters and is expected to increase further. Participation of Tata AIA and Birla Life is restricted to certain geographies. Hence, the company expects its market share to remain intact or marginally decline at AXISB.
Variance: Within non-operating variance of negative INR 540 mn , equity had a positive variance of INR 5.5 bn, however, debt had a negative variance. Operating variance had a negative impact due to assumption changes (mortality tightening of group credit life).
Others: a) Back book surplus impacted due to assumptions tightening; b) Increased rates in non-par to keep margins protected; c) Reverse merger process to take 18-24 months; d) IEV rose $20 \%$ YoY to INR 195 bn with operating RoEV of 20.2\%; e) With capital infusion of INR 16.1 bn, solvency margin rose to $206 \%$ in Apr'24 vs. $172 \%$ in Mar'24; f) Improvement in persistency across all major cohorts.

## Investment Summary

Valuations at 1.8x FY26E P/EV and ~9x FY26E P/VNB (after providing 20\% holdco discount) seem attractive, considering the expected $17 \%$ APE/VNB CAGR over FY24-26E. Maintain BUY with DCF-based TP of INR 1,280. Listing of Max Life separately over the next two years shall further unlock value, in our view.

## 4QFY24 RESULT REVIEW

## Kansai Nerolac Paints

## Driving premiumization to fight competition

#### Abstract

Kansai Nerolac Painst' (KNPL) 4QFY24 revenue performance was in-line while profitability was below expectations. KNPL reported revenue/ EBITDA/ PAT growth of 4\%/ 18\%/28\% YoY. Notably, decorative paints reported doubledigit volume growth while value growth was impacted due to higher promotions and price cuts. Industrial business performance was good, but witnessed sequential moderation due to weakness in commercial vehicles and decline in tractor volumes. In the coating business, powder coating performance was soft while liquid coating performance was driven by premiumization. In order to fight the upcoming competition, KNPL is focusing on the introduction of new premium products, expanding its dealer network, and looking for higher engagement with channel partners (influencers, painters, etc.) supported by higher A\&P spends to improve brand visibility. Profitability is expected to remain at current levels with stable raw material prices. Due to an undemanding valuation of $25 \times$ FY26E EPS, we maintain BUY rating with a TP of INR 400, based on 35x PER on FY26E EPS.

Industrial performance moderated, decorative paints registered double-digit volume growth KNPL recorded net sales growth of $3.5 \%$ YoY which was largely driven by decorative paints. Demand in industrial coatings was good, but moderated from the previous quarter. In automotive, the company witnessed strong growth in two \& three wheelers and refinish automotive, while the growth in commercial vehicles was soft and tractors declined to $12 \%$ due to a cyclic low demand. In performance coating, liquid coating witnessed growth due to robust infrastructure spending while demand in powder coating was marginal in 4 Q and FY24. Although premiumization saliency grew 120+ basis points led by construction equipment and alloy wheels segments. Decorative paints witnessed robust double-digit volume growth. In international business, Bangladesh declined due to restrictions on non-essential imports while Sri Lanka recovered with double-digit growth of $10 \%$. Growth in Nepal declined owing to severe decline in the paint market and the ongoing economic challenges.
Benign raw material prices and mix improvement led to margin improvement
Gross margin expanded 319 bps YoY to $34.8 \%$ due to moderation of raw material price inflation and mix improvement (higher contribution from premium porffolio). EBITDA grew $17.5 \%$ YoY and margin expanded by 128 bps YoY to $10.8 \%$ due to gross margin expansion. EBITDA margin expansion was lower than our expectations. During the quarter, employee costs increased by $16 \%$ YoY. Other expenditures increased by $11 \%$ YoY while other income rose $124 \%$ YoY to INR 320 mn . The company has stepped up its media spending to gain market share. We expect margin to remain in the range of $14 \%-15 \%$ in the near term.

## Investment Summary

Post 4QFY24 performance, we have cut our FY25 estimate by $3 \%$ while we maintain our FY26 estimate. Over the long term, we are of the view that KNPL's performance is expected to improve on the back of market share gain in industrial paints and recovery in demand momentum in decorative paints. We maintain BUY recommendation with a target price of INR 400 based on $35 x$ PER of FY26E EPS.

## Conference Call Highlights

- Automotive demand is good. With the economy growing the cyclicality of industrial paints is reducing.
- In rural areas, B2B is witnessing recovery and B2C segment is expected to follow suit.
- Raw material prices are stable and is expected to remain so.
- In decorative paint, 15+ products were launched last year and the saliency is 10\%. In Paints+ products saliency has increased by 150 bps.
- Paint as a service has scaled to 250+ cities and capacity developed to do 5,000+ sites in a month, growing MoM.
- The company is engaging directly with influencers and consumers. Dedicated investments are made to build infrastructure and set-up teams.
- New businesses have witnessed significant growth and the saliency has increased by 180 bps. Project business saliency has increased by 100 bps.
- The company is innovating with better technology to gain market share in the premium portfolio.
- In the powder coating business, the company has more than $40 \%$ market share and the focus is on premiumization.
- The company has increased allocation to digital advertising.
- Industrial paints, passenger vehicles, and 2 W business have grown well. CV and tractor performance was subdued.
- The current capacity is 611 mn liters per annum. The company is focusing on automation for factories.
- The company added nine depots in FY24, taking the total to 112 depots.
- As of now, there is no impact of Grasim's entry into the business. In the paint industry, it takes time to build infrastructure, brand, and consumer/ influencer connect.
- Industrial profitability has improved over the last two years and now margins are in double digit. The double-digit margin in B2B is healthy.
- The current level of EBITDA margin is healthy and sustainable. Industrial margin is around sustainable levels at $10 \%-15 \%$ and the decorative margin is expected to increase from current levels.
- Growth witnessed in decorative paints is because of volume growth as prices have come down due to drop in raw material prices. FY25 volume growth in decorative paints would remain in the double digits, with a $2 \%$ deviation.
- The company has higher saliency from the rural market. Recovery in the rural market should help further volume growth.
- The company has performed better in the North and West, while the South and East witnessed a lag.
- Distribution is expanding in double digits. The company has a weak presence in the South region.
- Capex for FY25 would be INR 3 bn. Greenfield expansion at Vizag and brownfield expansion in Jaipur plant. Maintenance capex is around INR 1.6 bn . Capacity expansion in decorative would be $25 \%$. Resin capacity expansion for the automotive business will be $15 \%$ of total capex.
- Decorative capacity is expected to increase 35\%-40\%.
- Royalty payment is done only on select products, which are less than $5 \%$.
- For the industry, the project business' contribution $4-5$ years back was only $5 \%$ and it is now 15\%.
- In automotive, the Japanese company's contribution is around 60\%.

## 4QFY24 RESULT REVIEW

## Century Textiles \& Industries <br> Blockbuster real estate numbers; strong guidance

Century Textiles \& Industries' (CENT) 4QFY24 highlight is the blockbuster response to its newly launched project Silas Niyaara (Niyaara tower 2). Silas clocked INR 25.6 bn at launch and to date has sold 72 units out of 148. Birla Niyaara tower 1, which was launched in Feb'22 and tower 2 (Silas) cumulatively sold INR 54.0 bn to date. With this strong performance, CENT clocked sales booking of INR 39.9 bn ( $82 \%$ YoY) and had surpassed its sales booking guidance of INR 30.0 bn for FY24. The company has a strong launch pipeline of nine projects (GDV ~ INR 120.0 bn) for FY25 across the top four markets of NCR, MMR, Bengaluru, and Pune. In addition, the company has given a strong guidance on sales booking ( $\sim$ INR 80 bn ) and business development (~GDV of INR 200 bn) for FY25. On the back of the ongoing upcycle and strong pipeline, we revise our sales booking estimates by 9\%/ 18\% over FY25-26E to INR 54 bn/ INR 70 bn. Reiterate BUY with a revised TP of INR 2,487 (previously INR 2,233), valuing the company on SoTP-based on EV/EBITDA multiple of 12.0x on sales booking EBITDA of FY26.

## 4QFY24/ FY24 in a nutshell

Sales booking during the quarter was at INR 28.8 bn ( $142 \% / 257 \%$ QOQ/ YoY) (vs. our estimate of INR 20.0 bn). Collections are at INR 5.2 bn ( $186 \% / 142 \%$ QoQ/ YoY). Delivered Birla Alokya, Bengaluru and phase 1 of Birla Vanya, Kalyan and Birla Navya, Gurugram; deliveries of the Kalyan and Gurugram projects to continue in FY25. In FY24, real estate revenue recognized NR 6.7 bn with $23 \%$ margin. During the quarter, paper business sales volume went up by $13 \%$ QoQ, but net sales realization (NSR) was down $15 \%$ YoY, leading to revenue of sales value of INR $8.6 \mathrm{bn}(-3 /-6 \% \mathrm{QoQ} / \mathrm{YoY})$. NSR during the quarter went down to INR 70,591/MT (-2/-15\% QoQ/ YoY) leading to EBITDA margin of $8 \%$ (vs. $18 \%$ in 4QFY23). Overall capacity utilization was at 99\% in 4QFY24 vs. 93\% in 4QFY23. Net debt stood at INR 24.8 bn as of Mar'24.
Demonstrated its ability to sell
Since commencing its business in FY20, the company has to date launched projects with GDV of INR 120.0 bn and sold INR 91.7 bn of its inventory ( $76 \%$ of the launched inventory); in the last three years it sold INR 80.8 bn. With a strong launch pipeline of ~INR 120.0 bn in FY25 and unsold inventory of ~INR 28.0 bn, we expect CENT to easily do INR 50-60 bn of sales booking in FY25; the company gave a guidance of $\sim$ INR 80.0 bn for FY25.
Tall and diverse pipeline
The company has a tall and diverse pipeline for FY25 with total GDV of INR 120.0 bn. New phases of Birla Trimaya, Bengaluru and Birla Navya, Gurugram with aggregate GDV of INR 20.0 bn are lined up in FY25. In addition to the new phases, CENT is expected to launch five new projects with launch GDV of INR 45.0 bn in Mumbai, Delhi, Pune, and Bengaluru. In addition to the above strong pipeline, FY25 may see the launch of Niyaara 3 with GDV ~INR 45.0 bn (if Niyaara 2 receive a strong response) and Thane with a launch GDV of INR 10.0 bn (may spill over to FY26).
Strong surplus cash flow visibility
With all of its ongoing projects significantly sold, the company has strong visibility of surplus cash flow. From the six ongoing projects, CENT has receivables of INR 63.9 bn with estimated cost to be incurred of INR 22.0 bn, giving strong surplus cash flow visibility.
Aggressive business development to continue
The company, in FY24, did BD of INR 160.0 bn . On an average, CENT expects to do BD of ~GDV of INR 160-200 bn every year. With all on-going projects significantly sold and being cash flow positive, we believe aggressive $B D$ won't stretch its balance sheet too much (peak debt may go up to INR 30 bn ). Also, additional fund requirement of $\sim$ INR 20.0 bn for acquiring INR 160-200 bn GDV projects (JV + outright purchase) could be funded by the promoter, using debt or through another fund raising platform.
Investment Summary
CENT's real estate business is going strong with all the projects witnessing strong absorption and the paper business is doing steady business. Strong response to Silas Niyaara (tower 2) has given it the impetus on scaling the real estate business further. We continue to remain structurally positive on CENT's growth prospects in the medium to long term. CENT is our top pick and we reiterate BUY with a revised TP of INR 2,487 (previously INR $\mathbf{2 , 2 3 0}$ ) valuing the company on a SoTP-based EV/ EBITDA multiple of $12 x$ on sales booking EBITDA of FY26 (earlier NAV). Key monitorable remains the business development traction in FY25.

## Rationale for implied EBITDA

Currently, we are seeing an exuberance in the realty sector with strong demand from end users across markets. We expect this up-cycle to continue at least for the next few years. In such a strong growth cycle, NAV premiums become highly subjective and NAV calculations do not fully capture the strong volume growth (>10\%). NAV calculations are a good valuation methodology when growth rates are less than 10\%-15\%. Currently, in India, we are seeing strong volume growth as well as price growth, leading to sales booking growth $>25 \%-30 \%$ amongst leading developers. Thus, the stock will trade much above NAV.
With the upcycle expected to continue and companies generating strong cash flows, these cash flows would be reinvested fuelling growth. Consequently, to capture strong growth in valuation we have used implied EBITDA (EBITDA on sales booking expected in FY26) and used a multiple on it. The advantage of this method is that it captures the operational performance and future growth.

## Valuation using implied EBITDA

CENT surpassed its sales booking guidance for FY24 and clocked INR 39.9 bn in FY24. Aided by a robust launch pipeline and aggressive business development velocity, we expect CENT to surpass INR 54 bn in FY25 and INR 70 bn in FY26.

[^21]
## Conference Call Highlights

- Textile segment discontinued. Net loss INR 1.4 bn.
- Projects delivered: Birla Vanya, Birla Navya, and Birla Alokya delivered ahead of RERA. Revenue recognized INR 6.87 bn in FY24 - INR 2.64 bn in Kalyan, INR 2.0 bn in Bengaluru, and INR 2.22 bn in Gurugram. EBITDA margin of $23 \%$ at the project level for these projects.
- Birla Niyaara Silas (tower 2), launched in Mar'24, sold 68 units valued at INR 23.91 bn. To date it has sold 72 units out of 148 units in tower 2. RERA delivery is 2028 for both the towers. Current selling rate INR 95,000/sq. ft. Niyaara 3 can be launched in 4QFY24 or spill over into FY25, depending on the performance of Niyaara 2.
- Land prices much firmer and pricey. Difficulty in concluding deals, but is confident of entering into deals in the target markets. Looking for both outright purchase and JV.
- Focused on residential projects. Also scouting for the right opportunities in the commercial space. This would be largely on the back of fund raising which is ongoing.
- Business development guidance of INR 150-200 bn in FY25.
- Demand is far outstripping supply. In the markets that CENT operates in there is a supply constraint due to fewer developers and increasing land price; it is difficult in getting approvals, etc. Thus, sustained demand is expected for the next few years.
- Launch pipeline: Has nine launches spread across the year: Walkeshwar, RR Nagar Trimaya phase 2, Pune, NCR, Sariapur with GDV of INR 120 bn. Expected to double FY24 sales booking performance.
- Net debt of INR 20.5 bn as there is investment in liquid instruments.
- Additional funds of INR 20.0 bn is required for acquiring INR 160-200 bn GDV projects. Of this $50 \%$ could be funded by the promoter and the remaining by debt or through another fund raising plafform. Third-party funding would be at the project level and not at the entity level.
- NCR market is very frothy. No supply. Few more deals being looked at in Delhi, Gurugram, and Noida. Expected to close a few of them.
- Net leasing income INR 1.19 bn in FY24.
- Paper: Paper segment EBITDA hit due to lower realization. The paper segment's low margin is due to cost constraint from procurement of goods and power. Aspiring for EBITDA of INR $50 / \mathrm{kg}$. Guidance is $12 \%-13 \%$ in FY25. Paper business demerger not considered currently. Paper business is a cash cow. INR 7.5 bn EBITDA. Acts as a growth capital for the real estate business which is in a growing phase.

## Story in Charts

Exhibit 1: Paper volume rose...

## 4QFY24 RESULT REVIEW

## Arvind SmartSpaces <br> Continued growth momentum

Arvind Smartspaces' (ARVSMART) FY24 highlights are the highest-ever sales booking at INR 11.1 bn ( $38 \% \mathrm{YoY}$ ) and strong operating cash flow of INR 4.56 bn ( $125 \%$ YoY). In FY24, the company launched four new projects in the new micro markets and sold INR 7.8 bn of its inventory, contributing 70\% of total sales. With a majority of the projects being horizontal (plotted/ villas/ row houses), the company experiences shorter cash collection cycles and robust operating cash flow. FY24 saw strong business development, with the company achieving a GDV of INR 41.5 bn and expanding its market presence to Surat. Strong BD coupled with a net cash balance sheet gives ARVSMART enough strength to undertake growth opportunities to capitalize on the underlying housing demand. On the back of the ongoing upcycle and a strong pipeline, we revise sales booking estimates by 6\%/ 10\% over FY2526E to INR 13.6 bn/ INR 16.9 bn. We maintain BUY rating with a revised TP of INR 1,041 (earlier INR 637) valuing the company on SoTP-based EV/EBITDA multiple of 10x (earlier 8x) on sales booking EBITDA of FY26.
4QFY24 in a nutshell
In 4QFY24, ARVSMART reported sales booking value of INR 3.2 bn (15\%/32\% QoQ/ YoY) vs our est. of INR 2.2 bn. In FY24, sales booking was at INR 11.1 bn ( $38 \%$ YOY) against a guidance of INR 10.0 bn. Sales booking was driven by new launches of Forest Trails, Bengaluru and phase 2 of Uplands 2.0, Ahmedabad; Arvind Orchards, Bengaluru; and Rhythm of Life, Ahmedabad. Collectively they contributed $70 \%$ of total sales in FY24. Collections during the quarter came in at INR 2.2 bn ( $11 \% / 14 \%$ QoQ/ YoY). For FY24, ARVSMART reported the besteever annual collections at INR 8.8 bn ( $46 \%$ YoY). Balance sheet continues to be net cash; net cash improved to INR 410 mn from INR 370 mn sequentially.

Strong business development leading to healthy pipeline
Strong business development efforts in FY24 have resulted in a robust pipeline of project launches in FY25. Bolstered by a healthy balance sheet and adept execution, the company is gaining momentum in expanding its project pipeline. Notably, the cumulative new business development with GDV of INR 41.5 bn underlines the company's considerable growth prospects. In FY25, the company plans to launch 6-8 projects or new phases worth INR 18.0-20.0 bn. With a robust business development pipeline, it's anticipated to add INR $50-55$ bn in FY25, supported by ample funding.

Looking ahead, vertical projects will play a significant role, aiming for a balanced mix with horizontal projects, targeting a share of $33 \%-50 \%$. The focus remains on strengthening its presence in key markets like Gujarat, Bengaluru, and Maharashtra; even as Bengaluru accounts for $38 \%$ of its total bookings.

## Investment Summary

FY24 demonstrated strong performance, with ARVSMART positioned for continued growth. The company is anticipated to maintain a 30\% CAGR for the next few years. With accelerated launches and a strong balance sheet, ARVSMART emerges as a key player in the real estate sector, positioned to leverage the housing market upcycle. We maintain BUY with a revised TP of INR 1,041 (earlier INR 637) valuing the company on a SoTP-based EV/ EBITDA multiple of 10x (earlier 8x) on sales booking EBITDA of FY26.

## Rationale for implied EBITDA

Currently, we are seeing an exuberance in the realty sector with strong demand from end users across markets. We expect this up-cycle to continue at least for the next few years. In such a strong growth cycle, NAV premiums become highly subjective and NAV calculations do not fully capture the strong volume growth (>10\%). NAV calculations are a good valuation methodology when growth rates are less than 10\%-15\%. Currently, in India, we are seeing strong volume growth as well as price growth, leading to sales booking growth $>25 \%-30 \%$ amongst leading developers. Thus, the stock will trade much above NAV.
With the upcycle expected to continue and companies generating strong cash flows, these cash flows would be reinvested fuelling growth. Consequently, to capture strong growth in valuation we have used implied EBITDA (EBITDA on sales booking expected in FY26) and used a multiple on it. The advantage of this method is that it captures the operational performance and future growth.

## Valuation using implied EBITDA

As expected, ARVSMART easily surpassed its guidance of INR 10 bn in FY24. Aided by a robust launch pipeline and aggressive business development velocity, we expect ARVSMART to surpass INR 14.4 bn in FY25 and INR 18.7 bn in FY26.

Table 1: SoTP valuation

|  | FY2 |
| :--- | ---: |
| Sales booking |  |
| Implied EBITDA @25\% | INR 18.7 bn |
| (a) EV of residential at 10x to EV/sales booking EBITDA | INR 4.7 bn |
| (b) Net cash (INR bn) | INR 46.8 bn |
| (c) Equity value (a + b) | INR .38 bn |
| (d) \# of shares | INR 47.2 bn |
| (e) Target Price (c/d) | 45.3 mn |

## Important Disclaimer:

This report has been prepared by Antique Stock Broking Limited (hereinafter referred to as ASBL) to provide information about the company(ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies).
ASBL is a Stock Broker having SEBI Registration No. INZ000001131 and Depository Participant having SEBI Registration No. IN-DP-721-2022(CDSL) registered with and regulated by Securities \& Exchange Board of India. SEBI Registration Number: INH000001089 as per SEBI (Research Analysts) Regulations, 2014. CIN: U67120MH1994PLC079444.
ASBL and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group.
This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and ASBL is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that ASBL and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on the profitability of ASBL which may include earnings from investment banking and other business.
ASBL generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, ASBL generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing among other things, may give rise to real or potential conflicts of interest. ASBL and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of ASBL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report
Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and, as such, may not match with a report on a company's fundamental analysis. In addition ASBL has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.
Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt ASBL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold ASBL or any of its affiliates or employees responsible for any such misuse and further agrees to hold ASBL or any of its affiliates or employees tree and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent ASBL's interpretation of the data, information and/ or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information herein on reasonable basis, ASBL and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent ASBL and/or its affiliates from doing so. ASBL or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to any person from any inadvertent error in the information contained in this report. ASBL or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitmess for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.
This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents.
ASBL and it's associates may have managed or co-managed public offering of securities, may have received compensation for investment banking or merchant banking or brokerage services, may have received any compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company in the past 12 months.
ASBL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
Subject Company may have been a client of ASBL or its associates during twelve months preceding the date of distribution of the research report
ASBL and/or its affiliates and/or employees and/or relatives may have interests/positions, financial or otherwise of over $1 \%$ at the end of the month immediately preceding the date of publication of the research in the securities mentioned in this report. To enhance transparency, ASBL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.
There are no material disciplinary action that been taken by any regulatory authority impacting equity research analysis activities

## Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report. The research analysts, strategists, or research associates principally responsible for preparation of ASBL research receive compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors and firm revenues

## Disclosure of Interest Statement Companies where there is interest

- Analyst ownership of the stock - No
- Served as an officer, director or employee - No

## Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject ASBL \& its group companies to registration or licensing requirements within such jurisdictions.
For U.S. persons only: This research report is a product of Antique Stock Broking Limited, which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (U.S.) and are not associated persons of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. brokerdealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with U.S. rules or regulations regarding, among other things, communications with a subject company, public appearances and trading securities held by a research analyst account. This report is intended for distribution by Antique Stock Broking Limited only to "Major Institutional Investors" as defined by Rule $15 \mathrm{a}-6(\mathrm{~b})(4)$ of the U.S. Securities and Exchange Act, 1934 (the Exchange Act) and interpretations thereof by U.S. Securities and Exchange Commission (SEC) in reliance on Rule $15 a 6(a)(2)$ ). If the recipient of this report is not a Major Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any U.S. person, which is not the Major Institutional Investor. In reliance on the exemption from registration provided by Rule $15 a-6$ of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major Institutional Investors, Antique Stock Broking Limited has entered into a chaperoning agreement with a U.S. registered broker-dealer, Marco Polo Securities Inc. ("Marco Polo"). Transactions in securities discussed in this research report should be effected through Marco Polo or another U.S. registered broker dealer.
